

2mg/Vial 99% Purity Human Growth Hormone Peptide Ftagment 176-191 For Fat Loss

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Frag176-191
- Minimum Order Quantity: 5box
- Price: US\$ 38-46/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Hgh Frag 176-191
- CAS: 863288-34
- Molecular Formula: C78H123N23O23S2
- Molecular Weight: 1817.1
- Specification: 2mg/vial, 10vials/box
- Appearance: White powder
- Storage: 2-8
- Highlight: **176-191 HGH Fragment Peptide, Fat Loss Hgh Frag 176-191**

Product Description

99% Purity Human Growth Hormone Peptide HGH Ftagment 176-191 for Fat Loss 2mg/vial

Basic Information Form Of Hgh Frag 176-191

Product Name	hgh frag 176-191
Cas No.	863288-34
Purity	99%
Appearance	White powder
Molecular Formula	C78H123N23O23S2
Molecular Weight	1817.1
Shelf Life	2 years
Storage	2-8

Brief Introduction of Hgh Frag 176-191

Similar to unmodified HGH, this truncated form of human growth hormone helps with fat metabolism and inhibits the creation of fatty acids and other lipids in the human body. But, it directly affects the adipose tissue, specifically the adipose fat cells, and increases lipolytic action. Therefore, the user's fat metabolism runs faster and stronger.

In other words.

HGH frag 176-191 is a more suitable option for fat loss than regular human growth hormone.

Also, HGH frag 176-191 has been seen to have anti-aging properties since it can increase the production of IGF-1 levels in the body. As part of a protein peptide regiment, HGH frag 176-191 has an amazing ability to prevent lipogenesis.

Moreover, as it is only a part of the HGH it does not compete for human growth hormone receptors, hence eliminating issues such as hyperglycaemia.

Studies also show that HGH frag 176-191 not only promotes fat loss but also brings about an increase in lean body mass, better sleep, enhanced protein synthesis, increased bone mineral density, and prompts weight loss.

It has been shown that the fat-reducing effects of GH appear to be controlled by a small analog region of the C-terminus end of the GH molecule. This region consists of amino acids 176-191, thus the name. This peptide fragment works by mimicking the way natural hGH regulates fat metabolism but without the adverse effects on blood sugar that is seen with unmodified HGH.

Application Of Hgh Frag 176-191

As a part of a peptide regiment, bodybuilders should seriously consider adding HGH Frag into their protocols.

1) It has an incredibly ability to regulate fat metabolism without the adverse side effects on insulin sensitivity.

By isolating the tail end of the GH molecule, scientist have found that HGH Frag 176-191 works even better than HGH to stimulate lipolysis (breaking down of fat).

2) In fact, it actually inhibits lipogenesis; meaning, it stops formation of fatty acids and other lipids.

Also, unlike other fat burning compounds out there, users will not experience hunger suppressing qualities or the jittery feelings that can be associated with ephedrine like compounds (think clenbuterol).

3) Since it does not compete for HGH receptors, multiple studies have shown that HGH Frag 176-191 will not cause hyperglycemia. In addition, it will promote lean body mass, protein synthesis, increase bone mineral density, and better sleep.

Package and Shipping of Hgh Frag 176-191

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of hgh frag 176-191

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
