

Human Growth GH Fragment 176-191 2mg/Vial For Body Shape Muscle Building

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GH Frag176-191
- Minimum Order Quantity: 5box
- Price: US\$ 38-46/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Gh Frag 176-191
- CAS: 863288-34
- MW: 1817.1
- MF: C78H123N23O23S2
- Appearance: White Powder
- Specification: 2mg/vial, 10vials/box
- Storage: 2-8
- Highlight: **Body Shape HGH Fragment 176-191, HGH Fragment 176-191 2mg/Vial**

WHY CHOOSE US

- 1 Own Factory**
Hongbaiyi has its own factory, which covers 18,000 square meters and is equipped with 4 standardized production workshops.
- 2 Professional Supplier**
Hongbaiyi is a professional supplier of APIs, pharmaceutical intermediates, veterinary medicine, cosmetic raw, nutritional supplements and other natural active ingredients.
- 3 Quality Assurance**
With strict QC system, our product quality is very reliable and stable. Besides, we have strong technical research and development strength.
- 4 Sales Team**
The experienced sales team of Hongbaiyi offers 24*365 quality service and the products were exported to over 40 countries around the globe.

Product Description

Human Growth Peptides GH Fragment 176-191 2mg/vial For Your Body Shape Muscle Building

Basic Information Form Of gh Frag 176-191

Product Name	gh frag 176-191
Cas No.	863288-34
Purity	99%
Appearance	White powder
MF	C78H123N23O23S2
MW	1817.1
Shelf Life	2 years
Storage	2-8

Brief Introduction of gh Frag 176-191

Similar to unmodified GH, this truncated form of gh helps with fat metabolism and inhibits the creation of fatty acids and other lipids in the human body. But, it directly affects the adipose tissue, specifically the adipose fat cells, and increases lipolytic action. Therefore, the user's fat metabolism runs faster and stronger.

In other words.

GH frag 176-191 is a more suitable option for fat loss than regular gh.

Also, GH frag 176-191 has been seen to have anti-aging properties since it can increase the production of IGF-1 levels in the body. As part of a protein peptide regiment, GH frag 176-191 has an amazing ability to prevent lipogenesis.

Moreover, as it is only a part of the GH it does not compete for gh receptors, hence eliminating issues such as hyperglycaemia.

Studies also show that GH frag 176-191 not only promotes fat loss but also brings about an increase in lean body mass, better sleep, enhanced protein synthesis, increased bone mineral density, and prompts weight loss.

It has been shown that the fat-reducing effects of GH appear to be controlled by a small analog region of the C-terminus end of the GH molecule. This region consists of amino acids 176-191, thus the name. This peptide fragment works by mimicking the way natural GH regulates fat metabolism but without the adverse effects on blood sugar that is seen with unmodified GH.

Application Of gh Frag 176-191

the GH fragment 176-191 stimulates lipolysis and inhibits lipogenesis both en vivo/en vitro.

Fragment 176-191 has shown no effect on growth or insulin resistance, unlike the full GH molecule. This is the newest, most powerful GH fragment on the market. Studies have shown sustained fatloss, aimed directly at adipose tissue.

It has been shown that the fat-reducing effects of GH appear to be controlled by a small analog region of the C-terminus end of the GH molecule. This region consists of amino acids 176-191, thus the name. This peptide fragment works by mimicking the way natural GH regulates fat metabolism but without the adverse effects on blood sugar or growth that is seen with unmodified GH.

Effects of GH Frag 176-191:

There isn't much to say about the effects of GH Frag 176-191 other than to say it directly promotes fat loss. The individual's metabolism runs stronger and the existing fat burns away faster. Is it a better option than regular GH for this purpose? That's a hard question to answer. Some data shows that it is a stronger or more suitable option. If fat loss is the only concern it does make sense to choose this fragment over the full form. If blood sugar issues are hard to control with GH, again it makes sense to give the fragment a try. However, you're also doing away with the almost innumerable benefits of GH when you rely only on the fragment. Recovery, a stronger immune system, healing, and all the related anti-aging properties, on this basis alone GH will always be the better option.

In terms of a fat loss agent, the effects of GH Frag 176-191 will not include the appetite suppressant effect of many over the counter fat burners or stimulant based effects like Clenbuterol. The individual may find he runs a little warmer (slightly) but that should be about it.

Package and Shipping of gh Frag 176-191

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of gh frag 176-191

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
