

## GH Fragment 176-191 Sterile Lyophilized GH Peptide 5mg/ Vial

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GH Frag176-191
- Minimum Order Quantity: 5box
- Price: US\$ 65-76/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

#### Product Specification

- Name: GH Frag 176-191
- CAS: 863288-34
- MF: C78H123N23O23S2
- MW: 1817.1
- Storage: 2-8
- Assay: 99.3%
- Appearance: White Powder
- Highlight: Human Growth Hormone Peptide 5mg/ Vial, Sterile HGH Fragment 176-191

## Product Description

### GH 176-191 Fragment Sterile Lyophilized GH Peptide 5mg/ Vial

#### Basic Information Form Of gh Frag 176-191

|              |                 |
|--------------|-----------------|
| Product Name | gh frag 176-191 |
| Cas No.      | 863288-34       |
| Assay        | 99.3%           |
| Appearance   | White powder    |
| MF           | C78H123N23O23S2 |
| MW           | 1817.1          |
| Shelf Life   | 2 years         |
| Storage      | 2-8             |

#### What Is gh Frag 176-191

GH Fragment 176-191, is an analog of the GRF which signals the effects of growth hormone. It is a 15-mer peptide residue of the C-terminus of GH to which tyrosine is added at the N-terminal end. This synthetically produced hormone is very common to weightlifters and bodybuilders because of a number of physical benefits. Studies claimed that it actually acts on the reduction of excessive adipose tissues such as those in the abdominal area, increase in muscle mass, and enhances the lipid content of the body.

These segments of the synthetic peptide AOD9604 have been researched for their in vivo effects in laboratory mice musculus. Results have shown that AOD9604 have resulted to a short-period increase in blood glucose and a more sustained increase in plasma insulin, together with other fragments such as 172-191, 177-191 and 178-191. In addition, the researchers have suggested that functionality of the peptide depends not only in the informational sequence but should also have the correct physical configuration.

These segments of the synthetic peptide AOD9604 have been researched for their in vivo effects in laboratory mice musculus. Results have shown that AOD9604 have resulted to a short-period increase in blood glucose and a more sustained increase in plasma insulin, together with other fragments such as 172-191, 177-191 and 178-191.

In addition, the researchers have suggested that functionality of the peptide depends not only in the informational sequence but should also have the correct physical configuration (Ng and Borstein 1978). Also, AOD9604, being a region of high accessibility to proteases and also rich in proline, have been demonstrated to affect the conformational change in the cytoplasmic domain of the band 3 of erythrocyte membrane protein by serving as the hinge for the pivoting of the two subdomains. This then suggest that such residue is significant in conformational changes be serving as sites for peripheral protein binding in some body cells (Low et al. 1984).

#### Application of gh Frag 176-191

The GH fragment 176-191 stimulates lipolysis and inhibits lipogenesis both en vivo/en vitro. Fragment 176191 has shown no effect on growth or insulin resistance, unlike the full GH molecule. This is the newest, most powerful GH fragment on the market. Studies have shown sustained fatloss, aimed directly at adipose tissue.

It has been shown that the fat-reducing effects of GH appear to be controlled by a small analog region of the C-terminus end of the GH molecule. This region consists of amino acids 176-191, thus the name. This peptide fragment works by mimicking the way natural GH regulates fat metabolism but without the adverse effects on blood sugar that is seen with unmodified GH.

#### Benefit of gh Frag 176-191

It has an incredibly ability to regulate fat metabolism without the adverse side effects on insulin sensitivity. By isolating the tail end of the GH molecule, scientist have found that GH Frag 176-191 works even better than GH to stimulate lipolysis (breaking down of fat). Also, unlike other fat burning compounds out there, users will not experience hunger suppressing qualities or the jittery feelings. There isn't much to say about the effects of GH Frag 176-191 other than to say it directly promotes fat loss. Other effect is lowering process if aging, strengthening bones (mineralization) and it leads to an elevated rate of energy expulsion

#### Package and Shipping of gh Frag 176-191

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

#### FAQ of gh frag 176-191

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
