

GHRP-6 Releasing Hexapeptide 5Mg For Muscles Building Ghrelin Receptor CAS 87616-84-0

Our Product Introduction

for more products please visit us on peptide-powder.com

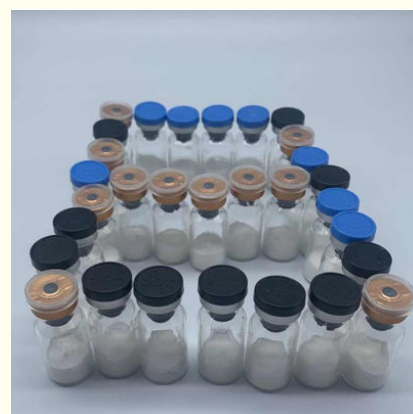

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GHRP 6
- Minimum Order Quantity: 5 boxes
- Packaging Details: 5mg/vial, 10vials/box; 10mg/vial, 10vials/box
- Delivery Time: About 3 work days after your payment
- Payment Terms: , T/T, Western Union
- Supply Ability: 5000kg/Month

Product Specification

- Product: GHRP 6
- CAS: 87616-84-0
- MF: C46H56N12O6
- Molecular Weight: 873.01
- Purity: 99%min
- Appearance: White Lyophilized Powder
- Storage: Store At -20°C. The Product Is Hygroscopic And Must Be Protected From Light.

Product Description

GHRP-6 Releasing Hexapeptide 5Mg For Muscles Building Ghrelin Receptor CAS 87616-84-0

Description Of GHRP 6

GHRP-6 causes stimulation of the anterior pituitary gland which ultimately causes an increase in GH release. Since GHRP-6 acts directly on the feedback loop which signals the inhibition of GH release, when natural GH secretion has been inhibited by long term synthetic use, GHRP-6 can be used to re-stimulate the natural production of GH. GHRP-6 also affects the central nervous system, by protecting neurons as well as increasing strength in a way very similar to the way certain steroids in the Dihydrotestosterone family do..

Information Form of ghrp 6

Product Name	GHRP 6
CAS NO.	CAS 87616-84-0
MF	C78H123N23O23S2
Purity	>99%
Appearance	white lyophilized powder
origin	China
Molecular weight	873.01

Application Of GHRP-6 ?

GHRP are not simply surrogates of GHRH, instead GHRP-6 is an artificial activator of a separate newly discovered receptor called Growth Hormone Secretagogue Receptor (GHS-R). Soon Ghrelin was discovered, the endogenous ligand that binds to the GHS-R. Both Ghrelin and all the synthetic compounds such as GHRP-6 were termed "Growth Hormone Secretagogues" (GHSs). One side effect of GHRP-6 is a significant increase in appetite due to stimulating the release of Ghrelin, a peptide that is released naturally in the lining of the stomach that increases

hunger and gastric emptying. Also, GHRP-6 causes stimulation of the anterior pituitary gland which causes an increase in Growth Hormone release. The increased amounts of Growth Hormone can cause the liver to secrete the hormone IGF-1, which improves the animal body's ability to burn fat and build muscle. Since GHRP-6 acts directly on the feedback loop which signals the inhibition of Growth Hormone release, GHRP-6 can re-stimulate the production of Growth Hormone.

What is GHRP-6 and used for ?

GHRP-6, also known as Releasing Hexapeptide, is a peptide hormone of the hormone class. As is with all related peptides, GHRP-6 is widely used to increase the amount of natural GH production in the body. And the increases in GH can be beneficial to anabolism, fat loss, recovery and general well being as well as serve possible anti-aging purposes.

GHRP-6 will show far greater benefits when used as part of a long-term anti-aging plan (Hormone Replacement Therapy) or in conjunction with other medications used to enhance performance.

How to use

GHRP-6 is a water based injectable that you will have to mix with bac water, and store. Remember, it is important to store GHRP-6 correctly after mixing it – in the fridge. It should be good for up to 3-4 weeks, so only mix what you plan on using during that time frame.

After you carefully mix it, this compound is typically injected subcutaneously with a skin pin. For best results, it must be taken daily, and users will typically do several injections per day in order to space it out. Interestingly, GHRP-6 works best if you take it when blood sugar levels are low, and you should not eat anything for an hour after using it.

If used solo, users will run 100-400 micrograms (mcg) per injection, and if stacked with another GH hormone, dosages can be cut in half.

How does it work?

GHRP-6 directly stimulates the anterior pituitary gland which subsequently leads to an increase in the release of growth hormones in the body.

As GHRP-6 directly affects the feedback loop which triggers changes in inhibition of the release of Growth Hormones, it can be used to restore the natural manufacturing of the Growth Hormone if natural secretion has been impaired because of long term artificial use.

GHRP-6 also reportedly has an impact on our nervous system. They are potentially capable of protecting neurons and increasing the strength of a person. The functioning of GHRP-6 is strikingly similar to the working of several steroids in the DHT family.

4.Package and Shipping of ghrp 6

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

5.FAQ of ghrp 6

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
