Product Description

99% Purity Human Growth Polypeptide Hormone GHRP-6 CAS 87616-84-0

Information Form of ghrp 6

Product Name	GHRP 6
CAS NO.	CAS 87616-84-0
Molecular Formula	C78H123N23O23S2
Assay	>99%
Appearance	white lyophilized powder
origin	China
Molecular weight	873.01

Description Of GHRP 6

GHRP-6, also known as Releasing Hexapeptide, is a peptide hormone of the hormone class. As is with all related peptides, GHRP-6 is widely used to increase the amount of natural GH production in the body. And the increases in GH can be beneficial to anabolism, fat loss, recovery and general well being as well as serve possible anti-aging purposes.

GHRP-6 will show far greater benefits when used as part of a long-term anti-aging plan (Hormone Replacement Therapy) or in conjunction with other medications used to enhance performance.

Applications of ghrp 6

GHRPs are not simply surrogates of GHRH, instead GHRP-6 is an artificial activator of a separate newly discovered receptor called Growth Hormone Secretagogue Receptor (GHS-R). Soon Ghrelin was discovered, the endogenous ligand that binds to the GHS-R. Both Ghrelin and all the synthetic compounds such as GHRP-6 were termed "Growth Hormone Secretagogues" (GHSs). One side effect of GHRP-6 is a significant increase in appetite due to stimulating the release of Ghrelin, a peptide that is released naturally in the lining of the stomach that increases hunger and gastric emptying.

While GHRP-6 is capable of inducing large increases in GH production when used alone, a given dose will show markedly more effect what a GHRH (releasing hormone) peptide is taken at the same time. Alternately, when combining a GHRH with GHRP-6, only about half or a third as much GHRP-6 is needed to obtain the same increase in GH production.

For this reason, it's a common choice to combine a GHRH with a GHRP, but excellent results are often obtained without doing so. A preferred choice of GHRH is Mod GRF 1-29 (also known as CJC-1295 without DAC.)

Effect of ghrp 6

The benefits of GHRP-6 are extremely appealing to many types of athletes, and those looking to improve their general well being.

GHRP-6 can help protect the body's muscles by boosting recovery and protein synthesis. What's more, it has also been shown to effectively fight inflammation.

Of course, we all want more muscle, and this compound will help increase muscle mass and development.

This is probably the reason people pony up the cash for GHRP-6, and it works great at aiding fat loss, which makes it a very good option for recomping or cutting.

The benefits of GHRP-6 are much more pronounced in those who are already in shape and conditioned. Therefore, if you are obese, or completely out of shape, then it is best to work on your conditioning first before using GHRP-6. Meanwhile, those that are in top shape, will benefit the most from this compound, as it is the icing on the cake.
