

GHRP-2 Polypeptide Human Growth Hormone Peptide CAS 158861-67-7 for Muscle Gain

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GHRP2
- Minimum Order Quantity: 5 box
- Packaging Details: 5mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 boxes per month

Melanotan II

Product Specification

- Peptide Name: Ghyp 2
- Molecular Formula: C₄₆H₅₆N₁₂O₆
- Molecular Weight: 817.9
- Purity: 99%
- Shelf Life: 2 Years
- Appearance: White Lyophilized Powder
- CAS No: 87616-84-0

WHY CHOOSE US

- 1 Own Factory**
Hongbaiyi has its own factory, which covers 18,000 square meters and is equipped with a standardized production workshops.
- 2 Professional Supplier**
Hongbaiyi is a professional supplier of APIs, pharmaceutical intermediates, veterinary medicine, cosmetic raw, nutritional supplements and other natural active ingredients.
- 3 Quality Assurance**
With strict QC system, our product quality is very reliable and stable. Besides, we have strong technical research and development strength.
- 4 Sales Team**
The experienced sales team of Hongbaiyi offers 24*365 quality service and the products were exported to over 40 countries around the globe.

Product Description

GHRP-2 Polypeptide Human Growth Hormone Peptide CAS 158861-67-7 for Muscle Gain

Product Details Of Ghrp 2 :

Product Name	Ghrp 2
Appearance	White powder
Specification	5mg/vial, 10vials/Box
Purity	99%
CAS	87616-84-0
MF	C46H56N12O6
MW	746.91

Description Of Ghrp 2

GHRP-2 is short for Growth Hormone Releasing Peptide 2, which basically refers to an hgH secretagogue, according to some research studies on rats, it can effectively increase the amount of natural secretion of hgH in the test subjects body and secrete it while stimulating the pituitary gland at the same time. Since the test subjects body will end up producing more growth hormones this way, fat will be reduced while lean muscle mass is increased. Along with this, IGF-1 levels will increase, as well, along with the different hypothalamus functions

GHRP – 2 is a true hGH secretagogue. Which means it stimulates the body's own secretion of hGH as explained in the study below. Human Growth hormone has been shown in studies to promote lean body mass and reduce adiposity (fat). 'The group compared ITT to stimulation with GH releasing peptide 2 (GHRP-2). The synthetic hexapeptide, also named pralmorelin, is derived from a metenkephalin peptide. It is the most potent of the family of synthetic GH stimuli known in humans and acts via the endogenous ghrelin receptor (12). As these receptors have been identified both in the hypothalamus and the pituitary, GHRP-2 action may not be restricted to the pituitary. It has been reported that growth hormone (GH)-releasing peptide-2 (GHRP-2), a ghrelin receptor agonist, has an anti-inflammatory effect.

Applications Of GHRP-2

GHRP-2 basically acts exactly like ghrelin. It can induce food consumption just like ghrelin and stimulate GH secretion, too. When infused, GHRP-2 makes the GH levels in the body increase a lot and it can induce cell cAMP secretion the way that GRF tends to, as well. GHRP-2 as a Growth Hormone Secretagogue.

GHRP-2 has been studied extensively for its utility as a growth hormone secretagogue (GHS). Scientists have discovered that the Growth Hormone Releasing Peptide-2 increases the natural production of growth hormone (GH). In the early 90's, one of the most famous studies was performed and later published in 1997 in the Journal of Endocrinology and Metabolism. This study further exemplifies the theory that growth hormone releasing peptides (including Ipamorelin and GHRP-6) could help hormone deficient adults and children. Ever since these major scientific studies, GHRP-2 has been widely produced. With other scientific labs confirming the results from their studies, GHRP-2 can in fact work for those who lack the ability to make adequate human growth.

GHRP-2 Dosage and Usage :

GHRP-2 comes as a lyophilized powder, it must be stored in a cool dry place and should be reconstituted using bacteriostatic water or sodium chloride meant for injection. Once the peptide has been reconstituted, GHRP-2 must be kept in a cold storage like the refrigerator until ready for use.

GHRP-2 can be taken in high dosages, if needed; however, it is still unclear how effective these high doses are. Normally, GHRP-2 will be used 2-3 times a day at around 100mcg-300mcg per injection.

Package and Shipping of Ghrp 2

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ Of Ghrp 2 :

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q3: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
