

Anti-Aging GHRP-2 Growth Hormone Releasing Peptides 5mg/vial 10mg/vial For Bodybuilding

Our Product Introduction

for more products please visit us on peptide-powder.com

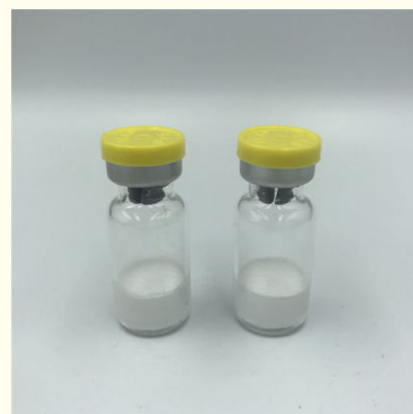

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GHRP2
- Minimum Order Quantity: 5 box
- Packaging Details: 5mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 boxes per month

Product Specification

- Peptide Name: Ghrp 2
- Molecular Formula: C₄₆H₅₆N₁₂O₆
- Molecular Weight: 817.9
- CAS No: 87616-84-0
- Purity: >99%
- Shelf Life: 2 Years
- Appearance: White Lyophilized Powder

Product Description

Anti-Aging GHRP-2 Growth Hormone Releasing Peptides 5mg/vial 10mg/vial For Bodybuilding

Product Details Of Ghrp 2 :

Peptide Name	Ghrp 2
Appearance	White powder
Specification	5mg/vial, 10vials/Box
Purity	98%
CAS	87616-84-0
MF	C46H56N12O6
MW	746.91

Description Of Ghrp 2

GHRP-2, like its brother GHRP-6, is a hexapeptide that is a pure growth hormone secretagogue. In addition, GHRP-2 is a synthetic agonist of ghrelin. Unlike GHRP-6, this peptide does not bring on the heavy hunger side effects associated with GHRP-6; however, some users will notice slight increases in hunger. Somewhere in between GHRP-6 and iPamorelin, this hexapeptide has the ability to be a serious contender when considering which GHRP to use with your GHRH.

Remember way back when I addressed the amazing ability GHRP-6 has in improving the production of the hormone ghrelin in the stomach (a hormone that controls hunger and GH release)? Well let me tell you about GHRP-2 and why this peptide is one step better than its little brother GHRP-6. Unlike GHRP-6, GHRP-2 does not come with the heavy hunger side effect, but still maintains all the benefits of activating ghrelin.

Ghrp2 is a synthetic ghrelin analogue. Like ghrelin, it stimulates growth hormone in the anterior pituitary to release endogenous substances. Just like ghrelin, it has synergistic effects with endogenous release hormone (GHRH) and synthetic GHRH analogues (such as Sermorelin or GRF (1-29)). GHRP2 and other ghrelin analogues increase the amount of somatotropin involved in the GH pulse by inhibiting somatostatin, while GHRH increases the pulse amplitude of each pituitary cell or growth hormone by other means. Unlike ghrelin, GHRP2 is not formed by fat, which means it does not induce fat storage. Although ghrelin has a very important role in starvation, GHRP2, which is an analog of ghrelin, does not significantly increase appetite. Due to the secondary effect on hypothalamic neurons, GHRP2 and GHRH have a synergistic effect.

Effects Of GHRP-2

The single polypeptide chain composed of six amino acids is a growth hormone releasing peptide. This hexapeptide not only functions to stimulate ghrelin release, but it also works to correct production of low level growth hormone. Simply put, GHRP-2 is perfectly designed with the intention of releasing human growth hormone from the pituitary gland. These mechanisms have been shown to promote lean body gains in lean body individuals. Since GHRP-2 is a ghrelin agonist, it helps to promote the secretion of human growth hormone in a two fold process. For one, it acts to boost growth hormone through amplification of the transduction pathway. In addition, it suppresses the action of somatostatin (a hormone which limits the release of growth hormone). These actions make GHRP-2 a perfect option to increase endogenous growth hormone levels.

Reduce body fat
 Increase muscle-
 Improve collagen production-improve
 Sleep quality-
 Increase cell repair and function

How to use GHRP-2 ?

In humans, a dose of 1mcg/kg (100mcg for a 100kg male) of GHRP-2 when combined with a GHRH of equal dosage creates a three-hour pulse of GH that is double the amplitude of an 8 IU synthetic (e.coli derived) growth hormone dose. IV, intramuscular and subcutaneous routes lead to different onset times but roughly similar peaks and declines.

Package and Shipping of Ghrp 2

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ Of Ghrp 2 :

- Q1: Do you Accept Sample Order?
 A: Yes. The smallest order we accept is one box.
- Q2: How long does it take to me if I order?
 A: About 3-5 days upon receipt of payment.
- Q3: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
