

Polypeptide Hormones Weight Loss Steroids Pentadecapeptide BPC 157 For Fat Burning

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-BPC-157
- Minimum Order Quantity: 5 Box
- Price: US\$ 55-65/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 3000kg/Month

Product Specification

- Name: BPC157
- CAS: 137525-51-0
- MF: C62H98N16N22
- Appearance: White Powder
- Storage: 2~8
- Shelf Life: 2 Years
- Specification: 5mg/vial, 10vials/box

Product Description

Polypeptide Hormones Weight Loss Steroids Pentadecapeptide BPC 157 For Fat Burning

Basic Information Form Of BPC157

Product Name	BPC157
Molecular Formula	C62H98N16N22
Cas No.	137525-51-0
Molecular Weight	1419.556
Shape	White powder
Purity	99%
Shelf Life	2 years

What is BPC157

BPC 157 (Body Protection Compound-157) is a 15-amino acid pentapeptide. The amino acid sequence in BPC 157 is similar to a portion of the human BPC amino acid sequence. Gastric acid found in human BPC. Experiments show that BPC157 can enhance wound healing, including tendon wounds, such as rat transected Achilles tendon. The aim of this study was to investigate the possible mechanisms by which BPC 157 was used to accelerate the healing process of injured tendons. The study used two sets of tendon explants, one of which was cultured in BPC157-containing medium and the other was cultured in a medium lacking BPC 157.

In addition, FITC-phalloidin staining demonstrated that BPC157 induced F-actin formation in fibroblasts. Similarly, Western blot analysis was able to detect the production and activation of pudding proteins and FAK proteins. Western blot analysis also showed that BPC157 increased the phosphorylation of puerarin and FAK protein without affecting the amount produced.

FITC-phalloidin staining demonstrated that BPC157 induced F-actin formation in fibroblasts. Similarly, Western blot analysis was able to detect the production and activation of pudding proteins and FAK proteins. Western blot analysis also showed that BPC157 increased the phosphorylation of puerarin and FAK protein without affecting the amount produced.

Application Of BPC157

BPC 157 has a strong antiinflammatory activity in acute and chronic inflammatory models and may be an important treatment for the treatment of inflammatory bowel disease. BPC 157 shows accelerated wound healing and has significant angiogenesis. But also significantly promote the healing of rat fractures, showing osteogenesis, significantly improve the healing of segmental bone defects. BPC 157 accelerated transection rat Achilles tendon and transverse rat quadriceps muscle healing, significantly accelerated the tendon The growth of explants. The proliferation of Achilles tendon myofibroblasts derived from cultured tendon fibroblasts by MTT was not directly affected by BPC 157.

Benifits Of BPC157

BPC 157 has been shown in rat studies to cure damaged quadriceps muscles, isolated Achilles tendon, damaged / shattered muscles

Muscle tearing rapid recovery

Muscle healing

Increased ligament healing

In the organ has a variety of protective effects

Human trials have proven to cure and prevent gastric ulcers

No adverse reactions were seen in human trials.

Package: 5mg/vial, 10vials/box

Shipping: With 3-5days after your payment

FAQ Of Enhanced Athlete BPC157

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
