

Natural Peptide Hormones Bodybuilding Ipamorelin 2mg For Athletes 170851-70-4

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Ipamorelin
- Minimum Order Quantity: 5box
- Price: US\$ 35-42 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Peptide Name: Ipamorelin
- CAS: 170851-70-4
- Chemical Formula: C38H49N9O5
- Molecular Weight: 711.86
- Peptide Purity: 99%
- Appearance: White powder
- Shelf Life: 2 Years
- Highlight: **Bodybuilding Ipamorelin Peptide,
Natural Peptide Hormones,
Athletes Ipamorelin Peptide Hormones**

Product Description

Natural Peptide Hormones Bodybuilding Ipamorelin 2mg For Athletes 170851-70-4

Brief Introduction of Ipamorelin 2mg

Ipamorelin is an interesting peptide taken 300mcg twice daily or you could lower the dose for 3 times daily, side effects are head rushes, I would recommend taking this 30 minutes before workout ,with gear, Ipamorelin is a new and potent synthetic pentapeptide which has distinct and specific growth hormone releasing properties. With the objective of investigating the effects on longitudinal bone growth rate , body weight , and growth hormone release, Ipamorelin in different doses (0, 18, 90 and 450 µg/day) was injected three times daily for 15 days to test subjects, After intravital Tetracycline labelling on days 0, 6, and 13, LGR was determined by measuring the distance between the respective fluorescent bands in the proximal tibia metaphysis. Ipamorelin dose-dependently increased LGR from 42 µm/day in the vehicle group to 44, 50, and 52 µm/day in the treatment groups .

There was also a pronounced and dose-dependent effect on body weight gain. The treatment did not affect total IGF-I levels, or serum markers of bone formation and resorption. The number of tartrate-resistant acid phosphatase-positive multinuclear cells in the metaphysis of the tibia did not change significantly with treatment.

Basic Information Form of Ipamorelin 2mg

Product Name	Ipamorelin 2mg
Cas No.	170851-70-4
Chemical Formula	C38H49N9O5
Appearance	White powder
Purity	99.5%
Shelf Life	2 years
Molecular Weight	711.86

Function of Ipamorelin 2mg

Ipamorelin can be said that it is similar to GHRP-6 in the way of increasing ghrelin and gastric motility, as well as, targeting a selective GH pulse. Though, the hunger sides on Ipamorelin are virtually zero. This makes it a much more versatile peptide for before-bed time dosing. Unlike GHRP-6 and GHRP-2, Ipamorelin was shown at high doses to have almost no direct impact on cortisol or prolactin production. This means users can dose higher and with greater frequency without having to be worried about cortisol and acetylcholine blood plasma levels being elevated. In short, it may be the mildest GHRP, but it is in no way the weakest. In fact, as a GHRP, it has shown to be one of longest lasting, and, at higher doses, the most potent. Ipamorelin's function is a slow building one that is much more like the body's natural growth hormone (GH) release. This makes it the healthiest choice in the bunch!

4. How to use Ipamorelin ?

After an athlete administers Ipamorelin, a selective pulse is sent that stimulates the hypothalamus/pituitary to release GH. This pulse can endure for approximately three hours after injection. Once the GH pulse is sent, the cells go directly to the muscle to support development while staying clear of any possible bone or cartilage growth. This is good for Ipamorelin users, as long term usage will effect lean body muscle growth without the possibility of experiencing any bone or cartilage deformities. The same cannot be said for synthetic HGH users, who experience pronounced side effect in swelling joints and even in some cases Carpel Tunnel. Ipamorelin will increase cell synthesis, elevate secretion levels of insulin from pancreatic tissue, and increase ghrelin in the stomach – which helps release GH and control hunger. All of these functions work to promote fat loss, shuttling of nutrients, and building clean muscle mass.

Package and Shipping of Ipamorelin 2mg

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Ipamorelin 2mg

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
