

Post Good Effect Synthetic Peptide Ipamorelin Hormone Powder 2 mg / vial For Burning Fat

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Ipamorelin
- Minimum Order Quantity: 5box
- Price: US\$ 36-48/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Ipamorelin
- CAS: 170851-70-4
- Molecular Formula: C38H49N9O5
- Molecular Weight: 711.86
- Appearance: White Lyophilized Powder
- Peptide Purity: 99.8%
- Shelf Life: 2 Years

Product Description

Post Good Effect Synthetic Peptide Ipamorelin Hormone Powder 2 mg / vial For Burning Fat

Basic Information Form of Ipamorelin

Peptide Name	Ipamorelin
Cas No.	170851-70-4
Molecular Formula	C38H49N9O5
Appearance	White powder
Purity	99.1%
Shelf Life	2 years
Molecular Weight	711.86

Brief Introduction of Ipamorelin

Ipamorelin is a penta-peptide And the strength it displays may very well make regular old GH obsolete. But what athletes and bodybuilders really want to know is what is this wonder peptide capable of doing, how is it used, and how does it compare to the other GHRP peptides.

Product Image of Ipamorelin

Application of Ipamorelin

According to scientific study that has been built around animal test subjects, it has been determined that Ipamorelin's primary functionality is associate with the stimulation of the pituitary gland. This is the pea-sized gland that is located in the bottom of the hypothalamus at the base of the brain and is responsible for the regulation and control of a host of functions that relate to the endocrine system.

Ipamorelin, like other peptides, comes as a freeze dried powder that is very delicate. You can store it in the refrigerator or at room temperature before reconstituting. Once reconstituted with bacteriostatic water, the vials must be stored in a cool dry place like your refrigerator. Insulin syringes are the best way to administer it, usually via subcutaneous injection.

Of course, using iPamorelin with a GHRH like CJC w/out DAC will give the user the biggest increase in GH and IGF-1 as GHRP's and GHRH's work together synergistically.

The average dosing for Ipamorelin is 200-300mcg two to three times daily. Twelve week cycles are quite normal and PCT would be very minimal - mini-pct is fine. If prolactin issues ever arise, there are products that help reduce prolactin and estrogen-like symptoms. These include aromatase inhibitors (Aromasin, Arimidex), and anti-prolactin aids like Dostinex (Cabergoline)

Package and Shipping of Ipamorelin

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Ipamorelin

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?
