

Powerfull Growth Hormone Releasing Hormone CJC 1295 With Dac 2mg For Lean Muscles

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-CJC 1295 With DAC
- Minimum Order Quantity: 5 box
- Price: Negotiable
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: CJC 1295 With DAC
- CAS: 863288-34-0
- MF: C165H271N47O46
- MW: 3367.89
- Appearance: White powder
- Specification: 5mg/vial, 10vials/box
- Storage: Cool Dry Place
- Shelf Life: 2 Years

Product Description

Powerfull Growth Hormone Releasing Hormone CJC 1295 With Dac 2mg For Lean Muscles Basic Information Form:

Product Name	CJC 1295 With DAC
Cas No.	863288-34-0
Assay	99%
Appearance	White powder
MF	C152h252n44o42
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction Of CJC 1295 With DAC

GHRH is specifically paired with GHRP in order to produce synergistic effects between the polypeptides, which will release the body's own growth hormone. Even if the peptide itself has some ability, it is most beneficial to run your GHRH with GHRP. That's why CJC 1295 is very desirable and it's one of the most widely used reasons in the fitness community. Now, CJC 1295 is most suitable for use is controversial. Although MODGRF (CJC 1295 without DAC) is commonly used for GHRP to increase pituitary GH pulses, more frequent injections are required. The CJC 1295 with DAC will produce a series of smaller pulses; therefore, the injection will be less frequent - usually 2-3 times per week.

Product Picture Of CJC 1295 With DAC

CJC 1295 With Dac And No Dac

As I have just said, when a person in the absence of DAC to see the case of CJC 1295, which really means that they are watching MOD GRF 1-29. This tetrasubstituted is a modified version of the original GRF 1-29 peptide, better known as Somatropin. Since the half-life of the original GRF 1-29 is extremely short, chemists can modify the peptide to provide longer biological activity, thereby reducing metabolic clearance. Despite the use of MOD GRF 1-29, its modification has led to greater peptide bonds, but the average user may still need to inject two to three times a day, with GHRP to obtain the maximum effect of releasing endogenous growth hormone. Now when the drug affinity complex (DAC) is added to the CJC 1295, it allows the use of a smaller GH pulse (once thought to be bleeding) is more likely, when combined with GHRP, it will activate the growth hormone Store in day and night release. This increases the peptide half-life to about one week when the DAC component is added and also provides a more stable blood level after injection. Now, we understand the importance of DAC factors, which makes the use of CJC 1295 and DAC and GHRP compared to more feasible and more cost-effective method. After the DAC is added, it can bind to the body's circulating albumin, which can last for several days because it looks for receptor binding. So briefly, if you prefer to use a shorter GH release spike, then using MOD GRF 1-29 (no DAC CJC 1295) will be the best. However, if you prefer fewer injections and still want to release your growth hormone store, injecting CJC 1295 and DAC twice a week, and your daily GHRP injection will be the way to maximize growth hormone release.

CJC 1295 DAC Dosage and Usage

Naming may cause you a loop, but do not let you stop you from understanding why you should use one of the best GHRH. CJC 1295 may be the best and most widely used GHRH for your choice of GHRP. Like all the other peptides you handle, it is a fine freeze-dried powder that should remain outside the light and in a cool dry place. With the use of injection of antibacterial water or sodium chloride for reorganization. As mentioned earlier, in order to simulate the natural release of growth hormone by natural peaks, you will achieve MOD GRF 1-29 (no DAC for CJC 1295) on the same day, 1-3 times a day at 100mcg-200mcg, and your GHRP select. Now, the most cost-effective, in my opinion, the better way to use CJC 1295 is to work with DAC's CJC 1295. This will allow bodybuilders or athletes to inject 2 mg of CJC 1295 and DAC weekly, injecting GHRP daily. This will provide a smaller but more frequent growth hormone pulse, which would ideally make the user closer to the exogenous HGH dose.

CJC1295 DAC has shown some amazing results as a hormone releasing hormone (GHRH) analog. Not only has CJC1295 shown the ability to

increase hormone and secretion and its benefits, but it has been able to do so in very large amounts. Recent research studies have shown that CJC - 1295 stimulates GH and Secretion, and will keep a steady increase with no increase in prolactin, leading to intense fat loss, and increases protein synthesis.

CJC-1295 DAC is a long acting Growth Hormone Releasing Hormone, which causes the anterior pituitary to release more hormone. The objective of the peptide was to treat visceral fat deposits in obese AIDS patients, as increased levels of exogenous are presumed to increase lipolysis (fat loss). The clinical research was ultimately successful for most research subjects. Ghrelin, released from the gut, which circulates and acts as a hunger hormone, has synergistic activity in the body with GHRH and also suppresses somatostatin to make way for the GHRH pulse. An example of a GHRP (Growth Hormone Releasing Peptide) is Hexarelin or GHRP2.

Package and Shipping of CJC 1295 With DAC

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of CJC 1295 With DAC

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
