

Anti-Aging Hormones Growth Peptide CJC-1295 with DAC For Bodybuilding CAS 863288-34-0

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-CJC 1295 With DAC
- Minimum Order Quantity: 5 box
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Peptide Name: CJC 1295 With DAC
- CAS: 863288-34-0
- Molecular Formula: C165H271N47O46
- Molecular Weight: 3367.89
- Purity: 99.6%
- Appearance: White powder
- Storage: Cool Dry Place
- Shelf Life: 2 Years

WHY CHOOSE US

- 1 Own Factory**
Hongbaiyi has its own factory, which covers 18,000 square meters and is equipped with a standardized production workshops.
- 2 Professional Supplier**
Hongbaiyi is a professional supplier of APIs, pharmaceutical intermediates, veterinary medicine, cosmetic raw, nutritional supplements and other natural active ingredients.
- 3 Quality Assurance**
With strict QC system, our product quality is very reliable and stable. Besides, we have strong technical research and development strength.
- 4 Sales Team**
The experienced sales team of Hongbaiyi offers 24*365 quality service and the products were exported to over 40 countries around the globe.

Product Description

Anti-Aging Hormones Growth Peptide CJC-1295 with DAC For Bodybuilding CAS 863288-34-0 Basic Information Form:

Product Name	CJC 1295 With DAC 2mg
Cas No.	863288-34-0
Purity	99.6%
Appearance	White powder
MF	C152H252N44O42
MW	3649.30
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction Of CJC 1295 With DAC

1.CJC-1295 is a derivative of human GH-releasing factor1-29(HGRF1-29). HGRF1-29 is a naturally occurring peptide that is actually a truncated form of a larger peptide that binds to the growth hormone secretagogue receptor (GHS-R) and causes the release of growth hormone. CJC-1295 has four amino acids substituted in its chain that result in strong binding to serum albumin and prolong its half-life in the body.

2.Because of the way CJC 1295 is engineered its half life has been extended from ~7 minutes to greater than 7 days!. This is convenient as it means the product only needs to be injected 1-2 times per week for continuously elevated levels of Human Growth Hormone (HGH) and IGF-1. A single subcutaneous (sc) injection results in measurable quantities of CJC-1295 in the blood for up to 13 days. Additionally, a single dose of 60 ug/kg of CJC-1295 results in elevated levels of growth hormone (125%) while the pulsatile secretion of GH is maintained. Furthermore, 60 ug/kg of CJC 1295 elevated IGF1 levels to the upper limit of normal. A dose of 30 ug/kg of CJC-1295 given weekly maintained its response with no evidence of desensitization.

The advantage of using CJC 1295 instead of actual HGH injections is that injecting HGH shuts down the body's own natural production and therefore when injections are ceased, the body's ability to produce it's own HGH may be impaired and take some time to recover. Since CJC 1295 only stimulates the body's own HGH production, this risk is not apparent. Another very positive benefit of CJC-1295/CJC-1293 is its ability to promote slow wave sleep. Slow wave sleep is also known as deep sleep and is the portion of sleep responsible for the highest level of muscle growth and memory retention. SWS are decreased significantly in older adults and also with people who tend to exercise later in the evening.

This peptide has a benefit to side effect ratio that exceeds all others currently being legally sold and would make a great addition to ones training regimen or post cycle therapy. Clinical Research was first conducted for CJC-1295 during the mid 2000s. The objective of the peptide was to treat visceral fat deposits in obese AIDS patients, as increased levels of exogenous hGH are presumed to increase lipolysis (fat loss). The clinical research was ultimately successful for most research subjects.

3.Possible benefits: Fat loss, muscle gain, increased collagen and reduced wrinkles, increased bone density, strengthened immune system, increased energy.

4.Dosage: 0.5mg (500mcg) taken 1-2 times per week

Doses per vial: 4 x 0.5mg doses (2 weeks worth)

When: Before bed on an empty stomach.

How: Subcutaneous injection into fat. It can be simultaneously injected in the same syringe as other peptides.

Water to mix: Add 1ml (100 units) of sterile solution to the vial. Every 500mcg is then equal to 0.25ml (25 units).

Best combined with: GHRP-6

CJC-1295 with DAC is a long acting Growth Hormone Releasing Hormone, which causes the anterior pituitary to release more growth hormone. GHRH is released in pulses in the body, which alternate with corresponding pulses of somatostatin (growth-hormone inhibiting-hormone). Clinical Research was first conducted for CJC-1295 during the mid-2000s. The objective of the peptide was to treat visceral fat deposits in obese AIDS patients, as increased levels of exogenous hGH are presumed to increase lipolysis (fat loss). The clinical research was ultimately successful for most research subjects. Ghrelin, released from the gut, which circulates and acts as a hunger hormone, has synergistic activity in the body with GHRH and also suppresses somatostatin to make way for the GHRH pulse. Studies shows that combining a GHRP-6 with CJC 1295 DAC, significantly increase the release of GH and IGF-1 production without an increase in prolactin. An example of a GHRP (GH Releasing Peptide) is Hexarelin or GHRP-2. CJC 1295 DAC is a exceptionally designed peptide and is known for being the finest of the hGH secretogues. The DAC (Drug Affinity Complex) portion increases the half-life by binding with serum albumin and protects the CJC-1295 DAC peptide from degradation. This was formed when a lysine link was bounded to DACs to a reactive chemical called maleimidopropionic acid (MPA).

Product Picture Of CJC 1295 With DAC

Benefits CJC 1295 With Dac

One of the main reasons fitness enthusiasts and the bodybuilding community look to CJC with DAC is for its ability to aid in healthy fat loss. Not only that, but CJC 1295 with DAC also helps with several other areas of health. That includes increasing muscle mass, healing faster, and even improving bone density. Because peptides naturally occur within the body, using this compound is a more naturalistic approach for all of these benefits. Some other things to look forward to includes a more efficient working immune system and even cellular repair for both skin and organs.

- Increased Muscle Mass
- Increased Fat Loss
- Better Bone Density
- Increased GH Secretion
- Higher IGF 1 Levels
- Improved Immune System Function
- Faster Healing and Recovery Times
- Cellular Repair for Skin & Organs
- Improved Cognitive Function & Memory

Package and Shipping of CJC 1295 With DAC

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ Of CJC 1295 With DAC

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
