High Purity Modified Anabolic Androgenic Steroids CJC-1295 Without DAC 863288-34-0

Basic Information Form Of CJC 1295 Without DAC

Product Name	CJC 1295 Without DAC
Cas No.	863288-34-0
Purity	>99%
Appearance	White powder
MF	C ₁₅₂ H ₂₅₂ N ₄₄ O ₄₂
MW	3649.30
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction Of CJC 1295 Without DAC

CJC 1295 without DAC, is a synthetic peptide that stimulates growth hormone production. This then promotes substantial muscle gain and lean body composition. Not only that, you'll also experience a decline in body fat and faster recovery from training and injuries. Since it is able to prompt the secretion of growth hormone, you're more likely to experience improved overall health. As we age, our growth hormone secretion tends to slow up leaving us with common age-related inefficiencies.

CJC-1295 without DAC is a protein that is 29 amino acids long and it is a GHRH analogue. CJC-1295 without DAC acts on receptors at the pituitary gland to stimulate the release of Human Growth Hormone. CJC-1295 could be referred to as a second generation derivative of GHRH, which is modified to create Releasing Factor 1-29, also known as Sermorelin. GRF 1-29 is then further modified to create Mod GRF 1-29 which is CJC-1295 without DAC.

Benefits Of CJC 1295 Without DAC

Dozens of benefits can come from the use of CJC 1295 w/o DAC, for one since it has one of the shortest half-lives it acts more naturally within the body. What that means is that instead of creating an elongation of growth hormone production, it creates a spurt of growth hormone. Which in looking at how the body works; it is more consistent with how our body naturally secretes its growth hormone. In addition to this tidbit of information, you'll want to also take it closer to your bedtime as this will coincide with the body's natural secretion of growth hormone. Benefits you can expect to experience from the use of CJC 1295 w/o DAC are similar to the effects of using CJC 1295 with DAC. What that means is that you'll see a reduction in fat and gains in lean muscle mass. You'll also experience faster recovery and improved cellular repair and regeneration. This may affect your hair, skin, and nails making them look effectively healthier as well.

Application & Effects Of CJC 1295 Without DAC

One of CJC-1295 benefits is linked to the peptide is the boosting of protein synthesis. Studies have led to the theory that the peptide's ability to

prevent natural cellular degradation can increase the amount of proteins in animal test subjects. Another theorized benefit revolves around the notion of reduced body fat, as the peptide's mechanics have demonstrated a tendency to promote lipolysis, which is the process where lipids get broken down.

As a result of this accelerated degradation of lipids over time, the level of body fat within an animal test subject has shown signs of dropping.
