

CJC1295 Without DAC Human Growth Hormone Peptide for Muscle Building CAS 863288-34-0

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-CJC 1295 With DAC
- Minimum Order Quantity: 5 box
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Peptide Name: CJC 1295 WithOut DAC
- CAS: 863288-34-0
- Molecular Formula: C165H271N47O46
- Molecular Weight: 3367.89
- Purity: 99.3%
- Appearance: White Lyophilized Powder
- Storage: Cool Dry Place
- Shelf Life: 2 Years

Product Description

CJC1295 Without DAC Human Growth Hormone Peptide for Muscle Building CAS 863288-34-0

Basic Information Form:

Product Name	CJC 1295 Without DAC
Cas No.	863288-34-0
Purity	99.3%
Appearance	White Lyophilized powder
MF	C152H252N44O42
MW	3649.30
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction Of CJC 1295 Without DAC

Modified GRF 1-29 is also known as Mod GRF 1-29, but even more commonly known as CJC-1295 without DAC. It is a protein that is 29 amino acids long and it is a GHRH analogue. CJC-1295 without DAC acts on receptors at the pituitary gland to stimulate the release of Human Growth Hormone.

CJC-1295 without DAC could be referred to more properly as a second generation derivative of GHRH.

GHRH is modified to create what is known as Releasing Factor (GRF) 1-29, also known as Sermorelin. GRF 1-29 is then further modified to create Mod GRF 1-29 which is CJC-1295 without DAC.

CJC-1295 can be used for any purpose of performance enhancement, although fat loss or recomping may be where it stands out the most. For the off-season athlete looking to pack on more size, CJC-1295 is not a very good choice, at least not when used alone.

Although it will promote anabolic activity, the overall anabolism it promotes will not be all that significant. However, when combined with other performance enhancing drugs, the individual may find he gets more out of them due to the increase in HGH and IGF-1 levels. He should also find that due to a stronger metabolism he is able to stay leaner when bulking than he may have otherwise.

This is not a license to eat like a pig; you can still gain fat when using CJC-1295 but you should have an easier time controlling fat gain when the peptide is in play. You may be able to get away with more than you would otherwise, but how much will be genetically dependent.

Product Picture Of CJC 1295 Without DAC

Applications Of CJC 1295 Without Dac

The DAC technology in the CJC-1295 enables the compound to bind itself covalently with any circulating albumin, after it has been administered through a subcutaneous injection. However, the reason why the half-life could be extended from a few minutes to several days is more profound. The reactive group in the CJC-1295 binds to a peptide through bioconjugation. The peptide then finds a nucleophilic unit within the blood and reacts with it in order to create a firmer bond.

When using any GHRH, it should always be remembered that positive results cannot be achieved overnight. These compounds act steadily over time, and the best results can be achieved slowly, and with a nutritious diet and a proper exercise regime. Also, these peptides are not sex-specific, so they do not have any androgenic effects. They can be used by women in the same dosages that men do.

What is CJC-1295 without DAC and used for?

Modified GRF 1-29 is also known as Mod GRF 1-29, but even more commonly known as CJC-1295 without DAC. It is a protein that is 29 amino acids long and it is a GHRH analogue. CJC-1295 without DAC acts on receptors at the pituitary gland to stimulate the release of Human Growth Hormone.

CJC-1295 without DAC could be referred to more properly as a second generation derivative of GHRH. GHRH is modified to create what is known as Releasing Factor (GRF) 1-29, also known as Sermorelin. GRF 1-29 is then further modified to create Mod GRF 1-29 which is CJC-1295 without DAC.

CJC-1295 without DAC Dosage

Mod GRF 1-29 is typically provided in vials containing 2 mg of lyophilized powder, though the amount can vary. The contents should be reconstituted by adding a convenient amount of sterile or bacteriostatic water. If for example 2 mL is chosen and the dosing of the vial is 2 mg, the resulting solution then has a concentration of 1 mg/mL, or 1000 mcg/mL.

At time of dosing, an insulin syringe is used to draw and then inject the desired amount. In the above example, a 100 mcg dose would require a volume of 0.10 mL, or "10 IU" as marked on an insulin syringe. Injection may be subcutaneous, intramuscular, or intravenous, according to personal preference. If desired, peptide solutions from other vials, such as a vial of a GHRP product, may also be drawn into the same syringe. This reduces the total number of injections required.

I ordinarily recommend a dosage of 100 mcg Mod GRF at a time, simultaneous with injection of a GHRP. For maximum effect, dosing is preferably three times per day at times of low blood sugar, for example about 30 minutes before a meal, but where use is ongoing, a common use is once per day prior to sleep.

Modified GRF 1-29(cjc1295 w/o DAC)

Dose per injection: 100mcg

Injections per vial: 20 x 100mcg dosages

Amount to Inject: If you have used 1ml of water for mixing then a 100mcg dosage = 0.05ml (or 5 units on Insulin Syringe). If you have used 2ml of water for mixing then 100mcg = 0.10ml (or 10 units) and if you have used 3ml of water for mixing, then 100mcg = 0.15ml (or 15 units).

Injection Frequency:

100mcg injected 1-3 times per day, preferably together with a GHRP Peptide at 100-200mcg.

Package and Shipping of CJC 1295 Without DAC

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ Of CJC 1295 Without DAC

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
