

Legal Peptide Bremelanotide Powder PT-141 10mg/vial Human Growth Hormone Releasing

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-PT141
- Minimum Order Quantity: 5 BOX
- Price: US\$ 51-57 / box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: PT 141
- Molecular Formula: C₇H₁₅NO₄
- Molecular Weight: 177.2
- CAS No: 32780-32-8
- Storage Temperature: 2~8 Centigrade
- Purity: 99.1%
- Appearance: White, Powder

WHY CHOOSE US

- 1 Own Factory**
Hongbaiyi has its own factory, which covers 18,000 square meters and is equipped with 4 standardized production workshops.
- 2 Professional Supplier**
Hongbaiyi is a professional supplier of APIs, pharmaceutical intermediates, veterinary medicine, cosmetic raw, nutritional supplements and other natural active ingredients.
- 3 Quality Assurance**
With strict QC system, our product quality is very reliable and stable. Besides, we have strong technical research and development strength.
- 4 Sales Team**
The experienced sales team of Hongbaiyi offers 24*365 quality service and the products were exported to over 40 countries around the globe.

Product Description

Legal Peptide Bremelanotide Powder PT-141 10mg/vial Human Growth Hormone Releasing

Basic Information form of PT141

Product Name	PT141
Cas	32780-32-8
Purity	99.1%
Appearance	White powder
MF	C ₇ H ₁₅ NO ₄
MW	177.2
pKa	13.92±0.70

Brief Introduction of PT141

PT-141 refers to a peptide developed for research purposes. It continues to undergo a range of studies to find out its potential benefits. It was originally the product of Melanotan, a peptide that stimulates the tanning process. This synthetic peptide mimics the functions of the peptide that is naturally developed within the body.

PT-141 (Bremelanotide) is a highly potent synthetic peptide analogue of α -MSH that may elicit aphrodisiac effects through stimulation of melanocortin receptors. PT-141 (Bremelanotide) consists of seven amino acids and is a cyclic, shortened lactam variant of alpha-Melanocyte-stimulating hormone (α -MSH), a multifunctional peptide that regulates a broad array of physiological functions. In studies, bremelanotide was shown to induce lordosis in an animal model and was also effective in treating sexual dysfunction in both men (erectile dysfunction or impotence) and women (sexual arousal disorder).

PT-141, bremelanotide is experimental and is used for the purpose of sexual arousal. It is a melanocortin based peptide that has shown effectiveness in clinical studies on both male and female rats. Male rats have shown erectileresponse with doses as low as 1-2 mgs whereas most female rats have shown positive results with higher doses around 2-3 mgs. While the dosage requirements tend to be higher for female rats, the observable results in female rats tend to be stronger. All the information above is strictly for research purposes only. Under no circumstance should this chemical be used for human consumption.

PT-141 has been research tested and shown to help improve, increase ones sexual arousal in both men and woman. (erectile dysfunction or impotence) as well as sexual dysfunction in women (sexual arousal disorder).

Bremelanotide, PT-141 does not act on the vascular system like the former compounds but it is known and has been shown to help increase sexual activity in both male and female mammals. Bremelanotide PT-141 allegedly works by activating melanocortin receptors in the brain , therefore helping increase ones sexual stimulation.

PT141 is a synthetic amino acid protein discovered during clinical trials using the Melanotan 2 for sunless tanning, photoprotection results from melanotans. Participants were documented as having experienced aphrodisiac reactions, leading to the further development PT-141. The melanocortin system targets receptors associated with desire through the melanocyte stimulating hormone paths that cross the blood-brain-barrier. Potentially the powerful sex-drug results feeling an aphrodisiac experience amplifying arousal pt141 reviews have shown the ability to increase libido effects of both men and women.

Product Image of PT141

Application Of PT 141:

PT-141 functions by activating the melanocortin 1 receptor and MC4R namely. Bremelanotide originally was tested for nasal spray delivery but was discontinued after concerns about side effects. Bremelanotide PT141, as Melanotan II, may cause spontaneous arousal enhancing effect. Unlike other supplements, pt 141 results do not act on the vascular body, but directly increases desires through the nervous system.

PT-141 or Bremelanotide is the generic term for a peptide being studied for its possible use in helping to improve sexual dysfunction in both men (erectile dysfunction or impotence) and women (sexual arousal disorder).

PT-141 has a similar structure to Melanotan-II and is a synthetic analogue of alpha-Melanocyte stimulating hormone (α -MSH). Alpha-MSH is an endogenous peptide that has potential influence over lipid metabolism, appetite, and sexual libido. PT-141 is a potential remedy for the treatment of sexual dysfunction and studies have shown that PT-141 does not act on the vascular system like former compounds, but allegedly works by activating melanocortin receptors in the brain, therefore helping increase ones sexual stimulation.

How Often Can You Use PT-141?

PT-141 peptide treatment for erectile dysfunction must be prescribed and monitored by a doctor. Current studies indicate that individuals would need to limit their number of doses of PT-141 to eight per month.

Is PT-141 a Sexual Enhancer for Women?

PT-141 Bremelanotide has been FDA-approved as a treatment for hypoactive sexual desire disorder (HSDD) in premenopausal women. This disorder is characterized by low sexual desire. Bremelanotide is administered by injection. The PT-141 dosage in female patients begins at .5mg. If you're wondering how often to take PT-141, most doctors recommend no more than once or twice a week.

Can I Use PT-141 Peptide Therapy With Other Treatments?

It's always best to speak with a medical professional to ensure any new product you wish to research will not interact with any treatments or medication you're already on.

Package and Shipping of PT141

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ Of PT141

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
