

Injectable GH Peptide MGF 2mg/Vial CAS 62031-54-3

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-PEG MGF
- Minimum Order Quantity: 5 BOX
- Price: US\$ 66-76/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: PEG MGF
- Molecular Formula: C121H200N42O39
- Molecular Weight: 2948.15
- Purity: 99.2%
- Appearance: White, Powder
- Synonyms: Pegylated MGF, PEG IGF-1 Ec, PEG Myotrophin

Product Description

Injectable GH Peptide MGF 2mg/Vial CAS 62031-54-3

Basic Information form of PEG MGF

Product Name	PEG MGF
Molecular Formula	C121H200N42O39
Purity	99.2%
Appearance	White powder
Molecular Weight	2948.15
Synonyms	Pegylated MGF, PEG IGF-1 Ec, PEG myotrophin
Shelf Life	2 Years

What is PEG MGF

MGF is a variant of 1GF-1 that stimulates myoblast division and allows muscle fibers to fuse and mature. This is the process required for adult muscle growth. The difference between 1GF-1 and MGF is that MGF stimulates myoblast division by stimulating different receptors.

In the early stages, the use of MGF is limited, because once in vivo, the product will collapse in a few minutes. But scientists have found a simple and brilliant decision to pegylated. The MGF molecule is attached to the polyethylene glycol molecule as a protective coating and allows the MGF to flow through the blood without being destroyed without losing its biological activity and efficiency.

Picture of PEG MGF

Function of PEG MGF

According to a British study say elderly men who exercised and received the grow hormone known as "mechano grow factor" (MGF) showed increased muscle mass.

MGF may also help treat age-related loss of muscle strength, which causes increased fragility.

This grow hormone may also benefit patients who can't do intensive exercise because of diseases such as muscular dystrophy, amyotrophic lateral sclerosis (ALS), kidney disease or cancer. MGF may even help slow muscle loss among astronauts who spend long hours in zero gravity during space travel.

MGF, which is produced naturally when muscles are stretched during exercise, activates stem cells already present in muscle tissue. Once activated, the stem cells begin to divide and create additional muscle fibers that increase the size and strength of the muscle.

Levels of MGF decline as people age. This, combined with a lack of intense physical activity, may cause muscle wasting in the elderly. While treatment with MGF may prove beneficial in such cases, the downside is that MGF has great potential for doping in sports.

Package and Shipping of PEG MGF

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of PEG MGF

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q3: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
