

Bodybuilding GH Peptide Lyophilized Raw Powder PEG MGF 2mg/vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-PEG MGF
- Minimum Order Quantity: 5 BOX
- Price: US\$ 65-75/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: PEG MGF
- Molecular Formula: C121H200N42O39
- Purity: 98%
- Appearance: White, Powder
- Molecular Weight: 2948.15
- Synonyms: Pegylated MGF, PEG IGF-1 Ec, PEG Myotrophin

Product Description

Bodybuilding GH Peptide Lyophilized Raw Powder PEG MGF 2mg/vial

Basic Information form of PEG MGF

Product Name	PEG MGF
Molecular Formula	C ₁₂₁ H ₂₀₀ N ₄₂ O ₃₉
Purity	98%
Appearance	White powder
Molecular Weight	2948.15
Synonyms	Pegylated MGF, PEG IGF-1 Ec, PEG myotrophin
Shelf Life	2 Years

What is PEG MGF

PEGylation is the act of attaching a Polyethylene glycol (PEG) structure to another larger molecule (in this case, MGF). The PEG acts as a protective coating and the theory here is that this will allow the MGF to be carried through the blood stream without being broken down. Neurological research has shown that utilizing PEGylated MGF resulted in a longer more stable acting version of the MGF peptide in serum/blood.

PEG MGF is a splice variant of the IG produced by a frame shift if the IG gene and PEGylated to improve stability. PEG-MGF, or PEGylated Mechano Growth Facto, is a new and innovative form of the IG produced by a frame shift if the IG gene, namely Mechano Growth Facto (MGF), which is PEGylated to improve stability that outperforms natural MGF many times over. MGF is a splice variant of the IG gene which increases stem cell count in the muscle and allows for muscle fibers to fuse and mature.

This is a process required for growth of adult muscle. Natural MGF is made locally and does not travel into the bloodstream. Synthetic MGF is water based and when administered intramuscularly, travels into the bloodstream. MGF is only stable in the blood stream for only a few minutes. Research has shown that PEG-MGF helps increase the muscle stem cell count, so that more may fuse and become part of adult muscle cells.

Picture of PEG MGF

Applications of PEG MGF

PEG MGF can be ran as a standalone peptide post workout, but it's especially useful on recovery days. By injecting 200mcg bilaterally PEG MGF will bind to receptors and actually help recover damaged muscle tissue better than IG-1. PEG MGF has also shown to signal satellite cells close to the damaged muscle tissue to grow just as if they were a part of the damaged tissue cells. This means that damaged cells are going to grow larger and faster, but also it is going to grow cells near the damaged tissue.

Rest days are the best way to get the most use out of PEG MGF, as you will have lower level of IG-1 and the long lasting PEG MGF will have the ability to run the course of the body while you focus on recovery. I have personally ran PEG MGF and administered into the quad regions after very long sessions where my quads were ripped to shreds. The recovery time and muscle growth in those areas was noticed after one week of use. Duly noted was the recovery time after a 100+ mile ride. On the recovery day, I administered 200mcg of PEG MGF and rested.

Package and Shipping of PEG MGF

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of PEG MGF

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q3: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
