

Melanotan II Popular The Tanning Drug 99% MT2 Human Growth Melanotan Peptides

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Melanotan 2
- Minimum Order Quantity: 5 box
- Price: US\$ 46-55 /box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Peptide Name: Melanotan 2
- CAS No.: 121062-08-6
- Peptide Purity: >99%
- Appearance: White Lyophilized Powder
- Molecular Formula: C50H69N15O9
- Molecular Weight: 1024.2
- Storage: 2-8°C
- Shelf Life: 2 Years

Product Description

Melanotan II Popular The Tanning Drug 99% MT2 Human Growth Melanotan Peptides

Basic Information Form of Melanotan 2

Name	Melanotan 2
CAS NO.	121062-08-6
Purity	>99%
MW	1024.2
MF	C ₅₀ H ₆₉ N ₁₅ O ₉
Appearance	White lyophilized powder
Storage	2-8°C

What Is Melanotan 2

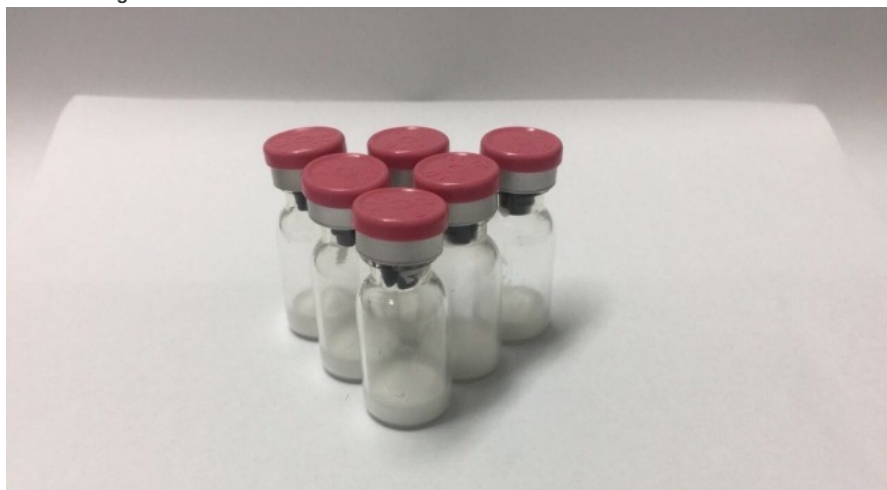

Melanotan II (Melanotan II) is an injectable peptide used mainly to vastly increase your body's ability to tan. The pigment of your skin getting darker is the result of UV ray exposure. As your skin becomes exposed to UV rays, melanin is produced to protect your skin from burning and sun damage.

A tan is almost like a shield of sorts.

The darker you are, the stronger your shield is. Hence why super pale people are the most prone to skin cancer and burning.

Melanotan II developed at the University of Arizona is a synthetic analog of the naturally occurring melanocortin peptide hormone alpha-melanocyte stimulating hormone (α -MSH) that in usage has been shown to have melanogenesis (tanning) and aphrodisiac effects in preliminary studies and clinical trials. It is a cyclic lactam analog of α -MSH with the amino acid sequence AC-Nle-cyclo[Asp-His-D-Phe-Arg-Trp-Lys]-NH₂.

More info about Melanotan 2:

Melanotan 2 is a synthetic peptide that studies have demonstrated to exhibit potent tanning (melanogenesis) and libido enhancing effects. Melanotan II is a variant of alpha-melanocyte stimulating hormone (α -MSH), a melanocortin peptide hormone which is produced naturally in the body. Structurally, Melanotan II is a cyclic heptapeptide analog of the alpha-melanocyte stimulating hormone (α -MSH) that tends to induce skin tanning. Melanotan II has the additional effect of increasing libido naturally through stimulation of the melanocortin receptors.

Melanocortin peptide system is critical signaling pathway for the actions of adiposity signals like leptin and insulin receptor. Reduced food intake is primarily responsible for weight loss on Melanotan II. MT-II reduces food intake until lowered leptin levels are attained. It can be given while fasting could prove to reduce both visceral and subcutaneous adipose compartments. ♦ With MT-II, one can get robust reduction in food consumption and body weight. ♦ However, the body can adjust the energy and food intake through its continuous application.

How does it work?

Melanotan 2 works by stimulating the release of the pigment melanin from the skin. Less UV exposure is necessary with Melanotan 2 compared to "normal tanning", and the tan that occurs with tanning injections is deeper and longer lasting than an individual's "normal tan". Melanotan works best (has the most noticeable effects) on people with fair skin tones.

How is MT2 Used?

The peptide is shipped enclosed in a vial. It is in a powder dried form that must be reconstituted using sterile water and then injected under the skin (subcutaneously) where it is absorbed into the skin and spread throughout.

Benefits of Melanotan 2

Lasting Tan: Even if the dosage is stopped, a warm sun-kissed tan can last for months at a time without any exposure to the sun. Conversely, tans developed naturally fade in around a months time.

Flexibility of Use: Able to take a small loading dose with continued dosing until desired skin pigmentation is achieved. Once achieved only need to dose once every couple of weeks to maintain the same pigment.

Reduced exposure to sunlight (UV rays): Melanotan still needs exposure to sunlight to be effective. However, it will allow the user a significant reduction in time to develop the desired tan.

Package and Shipping of Melanotan 2

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Melanotan 2

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
