

75921-69-6 Raw Human Growth Hormone Peptide Powder MT-1 for Skin Tanning Bodybuilding

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Melanotan-1
- Minimum Order Quantity: 5 box
- Price: US\$ 51-58/box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Melanotan-1
- Molecular Formula: C78H111N21O19
- Molecular Weight: 1646.35
- CAS No.: 75921-69-6
- Purity: >99%
- Appearance: White Powder
- Shelf Life: 2 Years

Product Description

75921-69-6 Raw Human Growth Hormone Peptide Powder MT-1 for Skin Tanning Bodybuilding

Basic Information Form of Melanotan-1

Name	Melanotan-1
CAS NO.	75921-69-6
Molecular Formula	C78H111N21O19
Molecular Weight	1646.85
Purity	>99%
Store	Cool Dry Place
Facade	White Powder

What Is Melanotan-1?

1.MT-1 (or Melanotan I,or Afamelanotide,or CUV-1647) is a synthetic analog of peptides nature of endogenous melanocortine peptide alpha-melanocyte stimulating hormone.It has hormones nature as well as common proteins features,its molecular weight/mass is 1646.88 and its molecular formula is C78H111N21O19.

2.Afamelanotide was specifically developed by American scientists LED by V.Hruby in 1991 as a possible research compound that can be used against skin cancer by stimulating tanning system which in own turn would generate protective natural tan during melanogenesis.So that synthetic analog was created to determine if it can show the same effect and stimulate melanocytes to produce and release melanin to protect skin from UV.Most of studies and trials were conducted in United States and Australia.

3.Developed research compound is quite stable cyclic form of original hormone but specifically has much longer half-life period.It works as agonist of specific melanocortin receptor and possesses such property as being selective;And thus it promotes increased level of eumelanin above usual pheomelanin,which provides higher efficacy of photoprotection abilities.

Application of Melanotan-1

MT-1 (or Melanotan I, or Afamelanotide, or CUV-1647) is a synthetic analog of peptides nature of endogenous melanocortine peptide alpha-melanocyte stimulating hormone. It has hormones nature as well as common proteins features, its molecular weight/mass is 1646.88 and its molecular formula is C78H111N21O19.

Afamelanotide was specifically developed by American scientists LED by V. Hruby in 1991 as a possible research compound that can be used against skin cancer by stimulating tanning system which in own turn would generate protective natural tan during melanogenesis.

So that synthetic analog was created to determine if it can show the same effect and stimulate melanocytes to produce and release melanin to protect skin from UV. Most of studies and trials were conducted in United States and Australia.

Developed research compound is quite stable cyclic form of original hormone but specifically has much longer half-life period. It works as agonist of specific melanocortin receptor and possesses such property as being selective

And thus it promotes increased level of eumelanin above usual pheomelanin, which provides higher efficacy of photoprotection abilities.

Package and Shipping of Melanotan-1

Package: 10mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Melanotan-1

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
