

Oxytocin Human Growth Hormone Peptide 2mg for Bodybuilding CAS 50-56-6

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Oxytocin
- Minimum Order Quantity: 5box
- Price: US \$ 32-39/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Oxytocin
- CAS No.: 50-56-6
- MF: C43H66N12O12S2
- MW: 1007.193
- Appearance: White Lyophilized Powder
- Purity: >99%
- Storage: Closed, Below 2 ~ 8 Preservation

Product Description

Oxytocin Human Growth Hormone Peptide 2mg for Bodybuilding CAS 50-56-6

Basic Information Form of Oxytocin

Name	Oxytocin
CAS NO.	50-56-6
MW	1007.193
MF	C43H66N12O12S2
Appearance	White Lyophilized Powder
Purity	99%
Stability	2 years

What is oxytocin 2mg?

Oxytocin can stimulate the myoepithelial cell around the mammary gland alveolus and gland vessel contracting, and promote milk ejection. Oxytocin can selectively stimulate uterus, and enhance contraction of the smooth muscle of the uterus. The stimulation effect to uterus is different, because of the dosage and the body hormone level. Low dose Oxytocin can strengthen the uterus to contract in the pregnancy end period; and high dose Oxytocin can cause the uterus smooth muscle tetanic contraction, and has the blood vessel pressed to hemostasis.

Product Image of Oxytocin

Applications Of Oxytocin

Oxytocin is used for stimulation of uterus contractions to facilitate parturition, induced abortion, postpartum hemorrhage, fetus membranes retains, and postpartum uterus meromorphosis.

2ml:20 Units, the proposed doses for subcutaneously or intramuscular administration of Oxytocin are 30~100I.U. for horse and cow, 10~50I.U. for caprine and swine, 2~10I.U. for dog.

Benefits Of Oxytocin

For Female, oxytocin is responsible for signaling contractions of the womb during labor. The hormone stimulates the uterine muscles to contract,

so labor begins. It also increases the production of prostaglandins, which move labor along and increases the contractions even more.

Because of this effect, synthetic oxytocin is sometimes used to induce a woman to start labor if she cannot start naturally, or it can be given to make contractions stronger if a woman's labor is slowing.

Once the baby is born, oxytocin promotes lactation by moving the milk into the breast. When the baby sucks at the mother's breast, oxytocin secretion causes the milk to release so the baby can feed. At the same time, oxytocin is released into the brain to stimulate further oxytocin production. Once the baby stops feeding, the production of the hormone stops until the next feeding.

For Male, oxytocin function is less important, but it does have a role to play in moving sperm. It also appears to affect the production of testosterone in the testes.

A recent oxytocin study found that it is an important chemical messenger that controls some human behaviors and social interaction. It is oxytocin that triggers the bond between a mother and an infant, and it may also play a role in recognition, sexual arousal, trust and anxiety. Some research shows that the hormone may affect addiction and stress as well.

Package and Shipping of Oxytocin

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Oxytocin

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
