

High Pure Dsip Peptide Natural Human Growth Hormone Peptide 62568-57-

4

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Dsip
- Minimum Order Quantity: 5box
- Price: US\$ 32-39/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Peptide Name: Dsip
- CAS: 62568-57-4
- MF: C35H48N10O15
- MW: 848.81
- Shelf Life: 2 Years
- Peptide Purity: 99%
- Appearance: White Powder

Product Description

High Pure Dsip Peptide Natural Human Growth Hormone Peptide 62568-57-4

Basic Information Form of Dsip

Peptide Name	Dsip
Cas No	62568-57-4
MF	C35H48N10O15
MW	848.81
Purity	99%min
Appearance	White Powder
Storage	-18°C
Shelf Life	2 years

Brief Introduction of Dsip

Delta sleep-inducing peptide, abbreviated DSIP, is a neuropeptide that when infused into the mesodiencephalic ventricle of recipient rabbits induces spindle and delta EEG activity and reduced motor activities.

Delta sleep-inducing peptide was first discovered in 1974 by the Swiss Schoenenberger-Monnier group who isolated it from the cerebral venous blood of rabbits in an induced state of sleep. It was primarily believed to be involved in sleep regulation due to its apparent ability to induce slow-wave sleep in rabbits, but studies on the subject have been contradictory.

DSIP is an amphiphilic peptide of molecular weight 850 daltons with the amino acid motif:
N-Trp-Ala-Gly-Gly-Asp-Ala-Ser-Gly-Glu-C

It has been found in both free and bound forms in the hypothalamus, limbic system and pituitary as well as various peripheral organs, tissues and body fluids. In the pituitary it co-localises with many peptide and non-peptide mediators such as corticotropin-like intermediate peptide (CLIP), adrenocorticotrophic hormone (ACTH), melanocyte-stimulating hormone (MSH), thyroid-stimulating hormone (TSH) and melanin concentrating hormone (MCH). It is abundant in the gut secretory cells and in the pancreas where it co-localises with glucagon.

In the brain its action may be mediated by NMDA receptors. In another study Delta sleep-inducing peptide stimulated Acetyltransferase activity through $\alpha 1$ receptors in rats. It is unknown where DSIP is synthesized.

Application Of DSIP

DSIP is used to help people to fall asleep and keep sleeping. This peptide is welcomed by bodybuilders who understand the function and potential of peptides through training and supplemental programs. In order to help the user sleep better, or can be stacked with other peptides in order to create a comprehensive supplemental procedure, the peptide can be used alone.

DSIP reduces basal adrenocorticotrophic hormone levels and prevents their release. It also makes the body easier to release LH (luteinizing hormone). In addition, it makes the body easier to release growth hormone (and growth hormone secretion) and prevent the production of somatostatin.

This peptide can help people manage stress. In addition, it may have the ability to reduce the symptoms of body temperature. It is also known as an effective means of normal blood pressure and myocardial contraction. Likewise, it can provide the benefits of antioxidants (slowing cell damage).

Package and Shipping of Dsip

Package: 2mg/vial, 10vials/box. 5mg/vial, 10vials/box.

Shipping: With 3-5 days after your payment

FAQ Of Dsip

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q3: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
