

Tesamorelin Bodybuilding Hormone Peptide Anabolic Steroids Weight Loss 2mg/ Vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Tesamorelin
- Minimum Order Quantity: 5box
- Price: US\$ 51-58 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Peptide Name: Tesamorelin
- CAS No.: 218949-48-5
- Appearance: White Lyophilized Powder
- MF: C221H366N72O67S
- MW: 5136
- Peptide Purity: 99.4%
- Highlight: **Tesamorelin Bodybuilding Hormone Peptide, Hormone Peptide Anabolic Steroids**

Product Description

Bodybuilding Hormone Peptide Anabolic Steroids Weight Loss Tesamorelin 2mg/ Vial 218949-48-5

Basic Information Form of Tesamorelin

Name	Tesamorelin
Cas No.	218949-48-5
Appearance	White powder
Molecular Formula	C221H366N72O67S
Molecular Weight	5135.8
Fineness	99.4%
Shelf Life	2 years

What Is Tesamorelin

Tesamorelin has been shown to reduce lipodystrophy in HIV-infected individuals; Lipodystrophy is a condition that causes changes in placement of body fat; including wasting and fat accumulation; and changes in metabolism; Similar to Tesamorelin is Sermorelin; which may be taken with GHRP-6 in clinical trials; that also promotes production and possible fat loss. Individuals with lipodystrophy may develop excess fat most notably around the liver, stomach and other abdominal organs & visceral body fat.

Tesamorelin is a synthetic hormone-releasing factor that stimulates the pituitary gland in the brain to secrete hormone; this indirect approach appears to maintain more stable; natural levels; like CJC-1295 DAC. Clinical trials have shown that tesamorelin significantly reduces abdominal fat with fewer side effects than human hormone itself; although abdominal fat may return after the Tesamorelin is discontinued; depending upon the individual; Tesamorelin has been shown to reduce lipodystrophy in HIV-infected individuals as well as similarly reducing abdominal fat in NON-HIV-Infected individuals.

Product Image Of Tesamorelin

Application Of Tesamorelin

Tesamorelin is a type of peptide called a growth-hormone releasing factor (GHRF). GHRF causes growth-hormone to be created and spread in the body, which helps increase metabolism, reduce belly fat, improve body shape, and use of energy.

Tesamorelin is a synthetic growth-hormone releasing factor that stimulates the pituitary gland in the brain to secrete growth-hormone; This indirect approach appears to maintain more stable, natural levels, like CJC-1295 DAC. Clinical trials have shown that tesamorelin significantly reduces abdominal fat with fewer side effects than human growth-hormone itself, although abdominal fat may return after the Tesamorelin is discontinued.

Tesamorelin is a peptide to reduce belly fat in patients who have the HIV virus. However, it's also a peptide that bodybuilders who are not HIV-positive are becoming very curious about. Due to its ability to reduce fatty deposits in the midsection.

It actually offers potential benefits to many different types of people.

Functioning of Tesamorelin?

Tesamorelin is a stabilized synthetic peptide analogue of the hypothalamic peptide, Human Growth Hormone Releasing Hormone (GHRH) indicated for the reduction of excess abdominal fat in HIV-infected patients with lipodystrophy. Lipodystrophy is a metabolic condition characterized by insulin resistance, fat redistribution, and hyperlipidemia associated with antiretroviral therapy for HIV infection.

Package and Shipping Of Tesamorelin

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Tesamorelin

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.
