

High Purity Sermorelin Sermorelin Acetate Peptide For Bodybuilding

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Sermorelin
- Minimum Order Quantity: 5 box
- Price: US \$ 35-42 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Sermorelin Peptide
- CAS No.: 86168-78-7
- Appearance: White Powder
- Molecular Formula: C149H246N44O42S
- Molecular Weight: 3357.9
- Peptide Purity: 99.5%
- Shelf Life: 2 Years
- Highlight: **High Purity Sermorelin Acetate Peptide , Sermorelin Acetate Body Building Peptides**

Product Description

High Purity Strength Enhancement Peptide Sermorelin Acetate For Bodybuilding

Basic Information Form of Sermorelin

Product Name	Sermorelin Peptide
CAS NO.	86168-78-7
MF	C149H246N44O42S
MW	1024.2
Appearance	White Powder
Peptide Purity	99.5%
Shelf life	2 years

What Is Sermorelin

Sermorelin / Sermorelin Acetate is a truncated analog of a growth hormone releasing factor GRF 1-44 that is naturally produced by the brain to stimulate pituitary production of gh. The increased volume of gh produced by the pituitary gland causes an increase in the production of Insulin-Like Growth Factor-1 by the liver and results in the benefits of treatment provided to the adult patient.

Sermorelin / Sermorelin acetate is the acetate salt of an amidated synthetic 29-amino acid peptide that corresponds to the amino-terminal segment of the naturally occurring gh releasing hormone consisting of 44 amino acid residues. It stimulates the pituitary gland to naturally produce increased amounts of gh.

Sermorelin / Sermorelin acetate shares similar structure to CJC-1295, is a bio-identical synthetic hormone that is extremely effective in increasing the amount of GH. Sermorelin acetate is a recently synthesized (man-made) peptide analogue of growth hormone releasing hormone a naturally occurring hormone that is produced in the hypothalamus and stimulates and controls the production of growth hormone within the pituitary gland.

Applications Of Sermorelin

Sermorelin / Sermorelin acetate has a wide range of positive effects. Due to its nature as a GHRH, sermorelin only increases the body's ability to produce more growth hormone, it is not an injection of growth hormone itself. In both a performance enhancing and general well-being sense, sermorelin has a wide array of benefits that make it a powerful and valuable substance.

Postive Effects Of Sermorelin

- 1) Sermorelin Strengthens the heart, Enhances the immune system
- 2) Sermorelin Increases IGF-1 production
- 3) Sermorelin Increases the development of lean body mass through the development of new muscle cells, Reduces body fat through lipolysis, Increases calcium retention, and strengthens and increases the mineralization of bone or bone density.
- 4) Sermorelin Increases energy and vitality
- 5) Sermorelin Increases strength and endurance
- 6) Sermorelin Accelerates healing from wounds or surgery
- 7) Improves sleep quality

How to use?

Sermorelin, along with the other peptides you will use, comes as a delicate lyophilized powder that should be kept out of the light and in a cool dry place. Reconstitution is done with bacteriostatic water (BC water) or sodium chloride meant for injection. Injections can be administered one hour before workout at a dose of 200mcg-300mcg. Normally, Sermorelin injections are taken before bed at around 300mcgs. The best time to take Sermorelin is prior to bedtime. Hormone is primarily released during sleep and most beneficial to the body's recovery and repair during this time. Sermorelin has a promoting effect on sleep and can therefore make you tired if taken during the day.

Sermorelin, along with the other peptides you will use, comes as a delicate lyophilized powder that should be kept out of the light and in a cool dry place. Reconstitution is done with bacteriostatic water (BC water) or sodium chloride meant for injection. Injections can be administered one hour before workout at a dose of 200mcg-300mcg.

Normally, Sermorelin injections are taken before bed at around 300mcgs. Of course, as with any GHRH, you will want to use this peptide alongside a GHRP like GHRP-2 or Ipamorelin for maximum release of growth hormone stores. Ideally, though user could still benefit from using a GHRH like CJC 1295 with DAC and a GHRP like Ipamorelin throughout the day and then utilize Sermorelin as a pre-bed timed dose. Do not discount Sermorelin as simply an anti-aging peptide. It can still help promote the growth of lean body mass and increase the availability of IGF-1 in the blood stream.

Package and Shipping of Sermorelin

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Sermorelin

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q4: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
