

Lyophilized Powder Copper Peptide Ghk-Cu For Anti-Wrinkle 340.37816

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC , UV
- Model Number: HBY-GHK-Cu
- Minimum Order Quantity: 1box
- Price: Negotiable
- Packaging Details: 10vials/box, 10mg/vials
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T, MoneyGram
- Supply Ability: 4000kg/Month

Product Specification

- Item: China Factory Lyophilized Powder Copper Peptide Ghk-Cu For Anti-Wrinkle 340.37816
- CAS No: 49557-75-7
- Appearance: Lyophilized Powder
- Purity: 99%Min
- Shelf Life: 24 Month
- Storage Temperature: In Cool,dry Place
- MW: 340.37816
- Packing: 10vials/box, 10mg/vials
- Highlight: **Anti Wrinkle Copper Peptide Ghk-Cu ,
Copper Peptide Ghk-Cu Powder ,
Ghk-Cu Cosmetic Peptide**

Product Description

What is China Factory Lyophilized powder Copper Peptide Ghk-Cu for Anti-Wrinkle 340.37816?

Basic Information:

Product Name	China Factory Lyophilized powder Copper Peptide Ghk-Cu for Anti-Wrinkle 340.37816
CAS no.	49557-75-7
Purity	99%
MW	340.37816
Storage	Cool dried storage
Shelf Life	2 years
Packing	10vials/box, 10mg/vials

What is Ghk-Cu?

GHK-Cu is known to be a peptide, a naturally occurring copper complex that was first identified in human plasma. It has also been found in different parts of the body, such as saliva and urine.

Copper peptides are usually very small and are naturally occurring protein fragments. They have a high affinity for copper ions. Evidence even suggests that they are essential for normal body function.

Many clinical studies have shown that GHK-Cu has different roles and benefits in the body, including:

- Wound healing
- Attracting immune cells
- Giving antioxidant and anti-inflammatory effects
- Stimulating collagen
- Synthesis of glycosaminoglycans in skin fibroblasts
- Promotes blood vessel growth

Clinical studies of GHK-CU

According to studies, GHK is present in human plasma, saliva and urine, but is decreasing. GHK has been proposed to function as a complex with copper 2+ to accelerate wound healing and skin repair. GHK stimulates the synthesis and breakdown of collagen and glycosaminoglycans. It also helps to regulate the activity of metalloproteinases and inhibitors.

GHK stimulates collagen, dermatan sulfate, chondroitin sulfate, as well as small proteoglycans and core proteoglycans. Researchers have also found that it can restore the replicative viability of fibroblasts after radiation therapy. Studies have also shown that it can accelerate wound healing in the skin, gastrointestinal tract, bone tissue and even dog foot pads.

In cosmetics, GHK has been found to tighten sagging skin:

- Elasticity
- Skin density
- Skin firmness
- Reduction of fine lines and wrinkles

- Reduces photodamage and hyperpigmentation
- And increased proliferation of keratin-forming cells

This has also been proposed as a therapeutic agent for skin inflammation, chronic obstructive pulmonary disease and even metastatic colonisation.

Package and Shipping Of China Factory Lyophilized powder Copper Peptide Ghk-Cu for Anti-Wrinkle 340.37816

Shipping: With 3-5 work days after your payment

FAQ

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines,TNT, FEDEX, EMS, ect.
