

99% Purity Tren Ace Muscle Growth Hormone Steroid CAS 10161-34-9

Our Product Introduction

for more products please visit us on peptide-powder.com

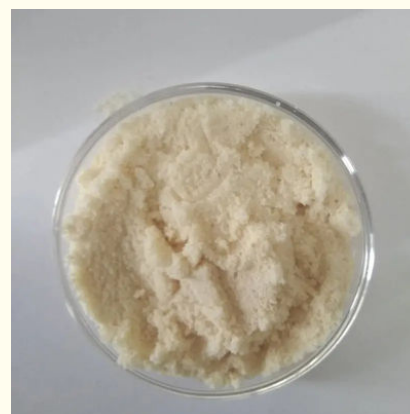

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Trenbolone Acetate
- Cas No.: 10161-34-9
- Molecular Formula: C₂₀H₂₄O₃
- Molecular Weight: 312.41
- Fineness: 99%
- Appearance: Yellow Or Light Yellow Crystal Powder
- Shelf Life: 2 Years
- Highlight: **Tren Ace Hormone Steroid,
CAS 10161-34-9 Tren Anabolic Steroids,
99% Purity Tren Ace**

Product Description

Trenbolone Acetate 99% Purity Muscle Growth Hormone Steroid Tren Ace CAS 10161-34-9

Description Of Trenbolone Acetate:

Trenbolone Acetate (or Tren A) has the molecular formula of $C_{20}H_{24}O_3$ and has an anabolic-androgenic ratio of 500:500. It has an active life of 2-3 days and has the molecular weight of 270.3706 g/mol at the base. Trenbolone Acetate, a 19-nor steroid, is derived from the compound Nandrolone. It is characterized by strong androgenic properties and no estrogenic activity. This anabolic steroid has a binding affinity for androgen receptor five times the strength Testosterone. Trenbolone acetate is admired globally by elite athletes as it can dramatically improve the uptake of nitrogen by muscles and improve the level of protein synthesis. Ideal for cutting cycles, Tren A does not get metabolized by aromatase or 5α -reductase into estrogenic compounds like estradiol or into Dihydrotestosterone (DHT).

Trenbolone Acetate is an extremely powerful anabolic steroid and is considered the single greatest anabolic steroid by many performance enhancing athletes, it is much easier to maintain peaked and stable blood levels with this version. By carrying the Acetate ester, this gives Trenbolone an active half-life of approximately two days.

Tren, whether as the acetate (Finaplix, Finajet), enanthate, or cyclohexylmethylcarbonate (Parabolan), should not be used as the sole anabolic in a steroid cycle. Mass gains are greatly limited when this is done. Instead, trenbolone should be stacked with Dianabol, Anadrol, or testosterone as the most common and highly suitable choices.

Tren exhibits interesting stacking behavior. Combination with either Dianabol or Anadrol gives a very strong synergistic effect. Even if the same total milligram amount of steroid is used per week, results are much better with such a combination than with any of these steroids used alone.

For example, 50 mg/day of trenbolone acetate used with 50 mg/day Dianabol gives much better results in a steroid cycle than either 100 mg/day TA used alone, or that amount of Dianabol used alone. I wouldn't recommend either of those single-drug usages for a steroid cycle, but the trenbolone/Dianabol stack has produced amazing physique changes in very many instances.

In contrast, trenbolone's stacking behavior with oxandrolone (Anavar), methenolone (Primobolan), or drostanolone (Masteron) is entirely different. If keeping the same total milligram amounts, these combinations do not outperform trenbolone used alone. So, while it's acceptable to combine these drugs, the purpose should not be to achieve increased total effect. Such combinations may be useful however to reduce side effects, or to accommodate the materials that are on hand.

Basic Information form Of Trenbolone Acetate:

Product Name	Trenbolone Acetate
Synonyms	Finaplix, Tren A, Finajet, Revalor-H, Reva
Cas No.	10161-34-9
Molecular Formula	$C_{20}H_{24}O_3$
Molecular Weight	312.41
Appearance	99%
Aspect	Yellow or light yellow crystal powder
Shelf life	2 years

Usage Of Trenbolone Acetate:

Trenbolone Acetate can be used as pharmaceutical material. Its main function is to promote metabolism. Anabolic effects include growth of muscle mass and strength, increased bone density and strength, and stimulation of linear growth and bone maturation .

Application Of Trenbolone Acetate:

Trenbolone Acetate is a steroid used by veterinarians on livestock to increase muscle growth and appetite. To increase its effective half-life, Trenbolone Acetate is not used in an unrefined form, but is rather administered as ester derivatives such as trenbolone acetate, trenbolone enanthate or trenbolone cyclohexylmethylcarbonate (Parabolan). Plasma lipases then cleave the ester group in the bloodstream leaving free Trenbolone Acetate.

Protein assimilation hormonal. Trenbolone Acetate is a steroid used by veterinarians on livestock to increase muscle growth and appetite, to increase the half-time, Trenbolone Acetate is not used in an unrefined form, but is rather administered as ester derivatives such as trenbolone acetate, trenbolone enanthate or trenbolone cyclohexylmethylcarbonate, a normal bodybuilding dosage can range from 200mg/week to 1400mg/

week. Trenbolone acetate can be injected once a week, also trenbolone acetate is often refined to as "Fina" by user, tren compounds have a binding affinity for the androgen receptor five times as high as that of testo.

Dosage Of Trenbolone Acetate:

Trenbolone produces great gains and little side effects when used appropriately. For general purpose Trenbolone Acetate pills are used at a dose of 50 -100 mg per day. Though, some professional users may use as much as 150mg per day. However, a dose of 35mg per day is recommended for individuals who show high sensitivity to Trenbolone specific side effects. However, majority of users stay within the range of 50 -75mg per day, as this gives great results especially when stacked with other anabolic steroids.

Package and Shipping Of Trenbolone Acetate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

With 3-5 days after your payment

FAQ Of Trenbolone Acetate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
