

Bodybuilding TREN Injectable Trenbolone Acetate Increase Muscle Strength

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Trenbolone Acetate
- Cas No.: 10161-34-9
- Molecular Formula: C₂₀H₂₄O₃
- Molecular Weight: 312.41
- Purity: 99.4%
- Appearance: Yellow Or Light Yellow Crystal Powder
- Shelf Life: 2 Years
- Highlight: **TREN Injectable Trenbolone Acetate, Increase Muscle Strength Trenbolone Acetate, Bodybuilding TREN Injectable**

Product Description

Powerful Bodybuilding TREN Injectable Trenbolone Acetate Help Increase Muscle Strength

What Is Trenbolone Acetate:

In a chemical sense, Trenbolone Acetate is a slightly modified version of nandrolone, the parent molecule in Deca Durabolin. As such, you can expect many of the same actions. However, Tren Acetate carries a couple of modifications that make it incredibly popular. First, this product does not aromatize, or convert to estrogen in the bloodstream. This is great news for those who are particularly sensitive to the androgenic effects of steroids. Second, it carries a short ester which means it begins working soon after use. It has an active half-life of just under three days, so every-other-day dosing is best.

Basic Information form Of Trenbolone Acetate:

Product Name	Trenbolone Acetate
Synonyms	Finaplix, Tren A, Finajet, Revalor-H, Reva
Cas No.	10161-34-9
Molecular Formula	C ₂₀ H ₂₄ O ₃
Molecular Weight	312.41
Purity	99.4%
Aspect	Yellow or light yellow crystal powder
Shelf life	2 years

What Does it Do:

Tren Acetate behaves like many other anabolic steroids. It enhances your body's ability to synthesize protein and it helps your muscle tissue retain more nitrogen. When your body is able to create proteins more quickly, and when the building blocks for those proteins (namely nitrogen) are available in abundance, you can experience muscle growth on an epic scale. Aside from this, Trenbolone Acetate will also work to promote insulin-like growth factor, which is responsible for repairing and rejuvenating tissues throughout your body. It also increases red blood count significantly; with more red blood cells, you can better oxygenate your muscles and provide them a prime environment for growth.

Trenbolone Acetate ester is very fast acting. Therefore, bodybuilders choosing to use this substance often find that daily injections are best for keep blood levels as consistent as possible. Simply put, Trenbolone is the most powerful overall steroid in use by bodybuilders today. Tren, as it is often called, is both highly androgenic and anabolic. makes the muscle produced by this drug very hard and defined.

**Application Of Trenbolone Acetate :**

Trenbolone Acetate is very fast acting. Therefore, bodybuilders choosing to use this substance often find that daily injections are best for keep blood levels as consistent as possible. Simply put .

Trenbolone Acetate is the most powerful overall steroid in use by bodybuilders today. Tren, as it is often called, is both highly androgenic and anabolic. It is chemically unable to aromatize, and therefore produces no estrogen buildup. This, along with its high androgenic properties, makes the muscle produced by this drug very hard and defined.

Tren Acetate can be used as pharmaceutical material. Its main function is to Promote metabolism. Anabolic effects include growth of muscle mass and strength, increased bone density and strength, and stimulation of linear growth and bone maturation.

Tren acetate is the most anabolic of all the non-estrogenic commercial steroids, with muscle-building properties often compared to test and Dianabol but without the same level of water retention and without estrogen conversion.

Package and Shipping Of Trenbolone Acetate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

With 3-5 days after your payment

FAQ Of Trenbolone Acetate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
