

99% Purity Steroid Powder Trenbolone Acetate Tren Ace For Muscle Building CAS 10161-34-9

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febré Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Trenbolone Acetate
- Molecular Formula: C₂₀H₂₄O₃
- Molecular Weight: 312.41
- Cas No.: 10161-34-9
- Purity: 99.2%
- Appearance: Yellow Or Light Yellow Crystal Powder
- Shelf Life: 2 Years
- Highlight: **99% Trenbolone Acetate Tren Ace, Muscle Building Trenbolone Acetate Tren Ace, 10161-34-9 tren ace muscle gain**

Product Description

99% Purity Steroid Powder Trenbolone Acetate Tren Ace for Muscle Building CAS 10161-34-9

What Is Trenbolone Acetate:

Trenbolone Acetate is a very fast acting steroid. It is also called Finaplix or Finabolan. In a chemical sense, Trenbolone Acetate is a slightly modified version of nandrolone, the parent molecule in Deca Durabolin.

As such, you can expect many of the same actions. However, Tren Acetate carries a couple of modifications that make it incredibly popular. First, this product does not aromatize, or convert to estrogen in the bloodstream. This is great news for those who are particularly sensitive to the androgenic effects of steroids. Second, it carries a short ester which means it begins working soon after use. It has an active half-life of just under three days, so every-other-day dosing is best.

Basic Information form Of Trenbolone Acetate:

Product Name	Trenbolone Acetate
Synonyms	Finaplix, Tren A, Finajet, Revalor-H, Reva
Cas No.	10161-34-9
MF	C ₂₀ H ₂₄ O ₃
MW	312.41
Purity	99.2%
Appearance	Yellow or light yellow crystal powder
Shelf life	2 years

Detailed info Of Trenbolone Acetate:

Trenbolone Acetate is also one of the best off-season bulking steroids available. Not only will it pack on a lot of mass and cause tremendous gains in strength, it will do so in a cleaner way than most traditional bulking steroids.

While it is not the only Tren form available, Trenbolone Acetate is preferred by most athletes. It is much easier to maintain peaked and stable blood levels with this version, and when coupled with the benefits it is not too hard to see why many refer to Trenbolone Acetate as the king of kings.

Trenbolone, whether as the acetate (Finaplix, Finajet), enanthate, or cyclohexylmethylcarbonate (Parabolan), should not be used as the sole anabolic in a steroid cycle.

Mass gains are greatly limited when this is done. Instead, trenbolone should be stacked with Dianabol, or testosterone as the most common and highly suitable choices.

Trenbolone acetate is the chemical name of the active ingredient in Finaplix. Finaplix is a registered trademark of Roussel Uclaf Corporation in the United States and/or other countries.

**Applications Of Trenbolone Acetate:**

Bodybuilding Steroids Trenbolone Acetate is very fast acting. Therefore, bodybuilders choosing to use this substance often find that daily injections are best for keep blood levels as consistent as possible. Simply put . Trenbolone Acetate is the most powerful overall steroid in use by bodybuilders today. Tren, as it is often called, is both highly androgenic and anabolic. It is chemically unable to aromatize, and therefore produces no estrogen buildup. This, along with its high androgenic properties, makes the muscle produced by this drug very hard and defined.

Tren Acetate can be used as pharmaceutical material. Its main function is to Promote metabolism. Anabolic effects include growth of muscle mass and strength, increased bone density and strength, and stimulation of linear growth and bone maturation.

Tren acetate is the most anabolic of all the non-estrogenic commercial steroids, with muscle-building properties often compared to test and Dianabol but without the same level of water retention and without estrogen conversion.

Package and Shipping Of Trenbolone Acetate:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

With 3-5 days after your payment

FAQ Of Trenbolone Acetate:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
