

17-Alpha-Methyl Testosterone 17-Methyltestosterone Male Sex Steroid Hormone CAS 58-18-4

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: 17-Methyltestosterone
- Cas No.: 58-18-4
- MF: C₂₀H₃₀O₂
- MW: 302.45
- Assay: 99.3%
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: **Male Sex 17-Alpha-Methyl Testosterone, Steroid Hormone CAS 58-18-4, 17-Methyltestosterone Steroid Hormone**

Product Description

Male Sex Steroid Hormone 17-Alpha-Methyl Testosterone 17-Methyltestosterone CAS 58-18-4

Basic Information form Of 17 - Methyltestosterone:

Product Name	Methyltestosteron
Other Name	17-Alpha-Methyl-Testosterone;17-Methyltestosteron
Cas No.	58-18-4
MF	C ₂₀ H ₃₀ O ₂
MW	302.45
Purity	99.3%
Appearance	white crystalline powder
Shelf life	2 years

Description Of Methyltestosterone:

Methyltestosterone (also known as Android, Androral, Oraviron, Testred, Virilon) is a 17-alpha-alkylated anabolic steroid and commonly it is used to treat men who do not make enough of a natural substance testosterone. It bears close structural similarity to testosterone, but has a methyl group at C17 in order to increase oral bioavailability.

In males, testosterone is responsible for many normal functions, including growth and development of the genitals, muscles, and bones. It also helps cause normal sexual development (puberty) in boys.

Methyltestosterone is similar to the natural testosterone produced by your body. It belongs to a class of drugs known as androgens. It works by affecting many body systems so that the body can develop and function normally.

Methyltestosterone may also be used in certain adolescent boys to cause puberty in those with delayed puberty.

Application Of Methyltestosterone:

Methyltestosterone is a 17-alpha-alkylated anabolic steroid used to treat men with a testosterone deficiency. It is also used in women to treat breast cancer, breast pain, swelling due to pregnancy, and with the addition of estrogen it can treat symptoms of menopause.

Methyltesto-sterone can promote the male sex organs and used in seedling stage sex change.

Methyltesto-sterone is a steroid hormone from the androgen and is found in mammals and other vertebrates, Methyltesto-sterone is primarily secreted in the tests of mails and the ovaries of female, although small amount are also secreted by the adrenal glands, Methyltesto-sterone is the principle male sex hormone and an anabolic steroid.

Methyltesto-sterone plays a key role in the development of male reproductive tissue such as the testis and prostates. In addition, Methyltesto-sterone is essential for health and well-being as well as the prevention of osteoporosis, Methyltesto-sterone is conserved through most vertebrates, although fish make a slightly difference from called 11-ketotesto-sterone.

While Methyltesto-sterone is not as common as it once was on the pharmaceutical market, it is still used in some areas around the world. Oddly enough, while it has been pulled from many markets, while many U.S. physicians rarely prescribe it. Methyltesto-sterone is in high supply on the U.S. pharmaceutical market. The compound has been used to treat low testosterone and andropause in men, as well as cryptorchidism.

It has also been somewhat successful in some breast cancer treatment plans, treating excess lactation post pregnancy and osteoporosis. Most interestingly, Methyltesto-sterone has had a fair amount of success in treating menopause by enhancing often lost libido and energy levels that often diminish during this stage of life for many women. While Methyltesto-sterone has enjoyed success in menopause treatment in the modern era, most women are now prescribed other testos-terone forms. Creams and gels are perhaps the most common. Testo-sterone and progesterone mixed creams have been highly successful as well as subcutaneous implant pellets like Testopel.

Package and Shipping Of Methyltestosterone:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

With 3-5 days after your payment

FAQ Of Methyltestosterone:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
