

Muscle Growth Bodybuilding Steroids 17-Methyltestosterone CAS 58-18-4 For Fat Cutting

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: 17-Methyltestosterone
- Cas No.: 58-18-4
- MF: C₂₀H₃₀O₂
- MW: 302.45
- Assay: 99.2%
- Appearance: White Crystalline Powder
- Shelf Life: 2 Years
- Highlight: **17-Methyltestosterone Bodybuilding Steroids, Fat Cutting 17-Methyltestosterone, Muscle Growth Bodybuilding Steroids**

Product Description

Muscle Growth Bodybuilding Steroids 17-Methyltestosterone CAS 58-18-4 For Fat Cutting

Basic Information form Of 17 - Methyltestosterone:

Product Name	Methyltestosteron
Other Name	17-Alpha-Methyl-Testosterone;17-Methyltestosteron
Cas No.	58-18-4
MF	C ₂₀ H ₃₀ O ₂
MW	302.45
Purity	99.2%
Appearance	white crystalline powder
Shelf life	2 years

Description Of Methyltestosterone:

Methyltestosterone is an oral testosterone hormone, the first oral testosterone preparation and the first C17-alpha alkylated (C17-aa) steroid ever made.

The compound has appeared over the years under numerous trade names, but perhaps the most well known Methyltestosterone compound of all time was Ciba's Metandren. Ciba's Methyltestosterone, while oral, was actually a sublingual form, which enhanced the bioavailability of the testosterone hormone. In fact, this form doubles the bioavailability compared to a tablet version and enables the individual to reach peaked testosterone levels in an hour.

If Methyltestosterone is used in tablet form, it can take approximately two hours for peak levels to be reached, not to mention carrying a much lower potency.

Picture Of Methyltestosterone:

**Use Of Methyltestosterone:**

Methyltestosteron is used for replacing the hormone testosterone when the body does not make enough and stimulating puberty. Treating advanced breast cancer in women who are 1 to 5 years postmenopause or in premenopausal women with a hormone-sensitive tumor.

Methyltestosteron is an androgen hormone. It works by increasing the level of testosterone in the blood.

Application Of Methyltestosterone:

- 1.Methyltestosterone is a pure testosterone hormone that has an added methyl group attached in order for the hormone to survive oral ingestion.
- 2 On a functional basis, Methyltestosterone provides testosterone to the body that it may be lacking. we look at the effects of Methyltestosterone.
- 3 As a pure testosterone hormone, Methyltestosterone is a perfect synthetic model of the primary male androgen testosterone.
- 4 Methyltestosterone will perform all the traits of the naturally produced hormone.The testosterone hormone greatly affects our physical and sexual wellbeing, and to a degree, even our mental function.

Package and Shipping Of Methyltestosterone:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

With 3-5 days after your payment

FAQ Of Methyltestosterone:

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?
