

CAS 863288-34-0 Growth Hormone Peptides CJC1295 With DAC Powder 2mg/Vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-CJC 1295 With DAC
- Minimum Order Quantity: 5 box
- Price: US\$ 72-79 box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: CJC 1295 With DAC
- CAS: 863288-34-0
- Molecular Formula: C165H271N47O46
- Molecular Weight: 3367.89
- Specification: 2mg/vial, 10vials/box
- Appearance: White powder
- Shelf Life: 2 Years
- Highlight: **2mg/Vial CJC1295 Peptides,
CJC1295 Growth Hormone Peptides,
CAS 863288-34-0 Growth Hormone Peptides**

Product Description

CAS 863288-34-0 Growth Hormone Peptides CJC1295 with DAC Powder 2mg/Vial Basic Information Form:

Product Name	CJC 1295 With DAC
Cas No.	863288-34-0
Purity	>99%
Appearance	White powder
MF	C152h252n44o42
MW	3649.30
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction Of CJC 1295 With DAC

CJC-1295, also known as CJC-1295 DAC, is a synthetic analogue of growth hormone-releasing hormone (GHRH) growth hormone-releasing factor (GRF), which was developed by ConjuChem. It is a modified form of GRF (1-29), with an improved half-life. CJC-1295 markedly increases plasma growth hormone (GH) and insulin-like growth factor 1 (IGF-1) levels in both animals and humans. Clinical studies have shown that the administration of CJC-1295 may increase body weight, increase total pituitary RNA and growth hormone. The increase in total pituitary RNA and growth hormone suggests that more growth hormone releasing cells were created.

Applications CJC 1295 With Dac

- 1.Enhanced human sexual performance
- 2.Hair regrowth
- 3.Improved cholesterol profile
- 4.Reduced body fat, weight loss
- 5.Superior immune function
- 6.Greater cardiac output
- 7.Increased muscle mass

CJC-1295 DAC has shown some amazing results as a hormone releasing hormone (GHRH) analog. Not only has CJC-1295 shown the ability to increase hormone and secretion and its benefits, but it has been able to do so in very large amounts. Recent research studies have shown that CJC - 1295 stimulates GH and Secretion, and will keep a steady increase with no increase in prolactin, leading to intense fat loss, and increases protein synthesis.

CJC-1295 DAC is a long acting Hormone Releasing Hormone, which causes the anterior pituitary to release more hormone. GHRH is released in pulses in the body, which alternate with corresponding pulses of somatostatin (-hormone inhibiting-hormone). Clinical Research was first conducted for CJC-1295 during the MID-2000s. The objective of the peptide was to treat visceral fat deposits in obese AIDS patients, as increased levels of exogenous are presumed to increase lipolysis (fat loss). The clinical research was ultimately successful for most research subjects. Ghrelin, released from the gut, which circulates and acts as a hunger hormone, has synergistic activity in the body with GHRH and also suppresses somatostatin to make way for the GHRH pulse. Studies shows that combining a GHRP-6 with CJC 1295 DAC, significantly increase the release of GH and production without an increase in prolactin. An example of a GHRP (GH Releasing Peptide) is Hexarelin or GHRP-2. CJC 1295 DAC is an exceptionally designed peptide and is known for being the finest of the secretogues. The DAC (Drug Affinity Complex) portion increases the half-life by binding with serum albumin and protects the CJC-1295 DAC peptide from degradation. This was formed when a lysine link was bounded to DACS to a reactive chemical called maleimidopropionic acid (MPa).

Feedback Of CJC 1295 With DAC

HBV bodybuilding peptides PF141/ PT 141 10...

★★★★★

Really happy with the awesome customer service i was provided by Tracy Zhang. Very friendly and professi onal. Quality product!
