

2mg/Vial Body Building Peptides HGH Fragment 176-191 For Muscle Building

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Frag176-191
- Minimum Order Quantity: 5box
- Price: US\$ 37-42/ box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: HGH Fragment 176-191
- CAS: 863288-34
- Molecular Weight: 1817.1
- Appearance: White powder
- Molecular Formula: C78H123N23O23S2
- Specification: 2mg/vial, 10vials/box
- Storage: 2-8
- Highlight: **Muscle Building HGH Fragment 176-191, HGH 176-191 Body Building Peptides, 2mg/Vial Growth Hormone Peptide**

Product Description

Body Building Peptides HGH Fragment 176-191 2mg/vial For Muscle Building

Basic Information Form Of HGH Fragment 176-191

Product Name	HGH Fragment 176-191
Cas No.	863288-34
Peptide Purity	99.5%
Aspect	White powder
Molecular Formula	C78H123N23O23S2
Molecular Weight	1817.1
Shelf Life	2 years
Storage	2-8

What Is HGH Fragment 176-191

The HGH Fragment is a modified form of amino acids 176-191 at the C-terminal region of the human growth hormone (HGH). Studies have shown that it works by mimicking the way natural HGH regulates fat metabolism but without the adverse effects on insulin sensitivity (blood sugar) or cell proliferation (muscle growth) that is seen with unmodified HGH. Like unmodified GH, the HGH fragment 176-191 stimulates lipolysis (breaking down of fat) and inhibits lipogenesis (the formation of fatty acids and other lipids in the body).

HGH fragment 176-191 is meant to be 12.5 times stronger than human growth hormone (HGH) for weight loss than standard human growth hormone (HGH).

Of particular note is that in studies HGH fragment 176-191 had the ability to increase IGF-1 levels which translates into the fragments ability to give anti-aging effects.

Benefit Of HGH Fragment 176-191

There isn't much to say about the effects of HGH Frag 176-191 other than to say it directly promotes fat loss. The individual's metabolism runs stronger and the existing fat burns away faster. Is it a better option than regular HGH for this purpose? That's a hard question to answer. Some data shows that it is a stronger or more suitable option. If fat loss is the only concern it does make sense to choose this fragment over the full form. If blood sugar issues are hard to control with HGH, again it makes sense to give the fragment a try. However, you're also doing away with the almost innumerable benefits of HGH when you rely only on the fragment. Recovery, a stronger immune system, healing, and all the related anti-aging properties, on this basis alone HGH will always be the better option.

In terms of a fat loss agent, the effects of HGH Frag 176-191 will not include the appetite suppressant effect of many over the counter fat burners or stimulant based effects like Clenbuterol. The individual may find he runs a little warmer (slightly) but that should be about it.

Feedback Of HGH Fragment 176-191

HBV bodybuilding peptides PT141/ PT 141 10...

★★★★★

Really happy with the awesome customer service i was provided by Tracy Zhang. Very friendly and profess...

Tracy Zhang
