

Polypeptide Steroids Hormone Peptide Frag 176-191 5mg For Muscle Building

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Frag176-191
- Minimum Order Quantity: 5box
- Price: US\$ 64-70/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: HGH Frag 176-191 5mg
- CAS: 863288-34
- Appearance: White powder
- MW: 1817.1
- MF: C78H123N23O23S2
- Storage: 2-8
- Specification: 5mg/vial, 10vials/box
- Highlight: **Frag 176-191 Hormone Peptide, Muscle Building Frag 176-191, Polypeptide Steroids Hormone Peptide**

Product Description

Polypeptide Steroids Hormone Peptide Frag 176-191 5mg For Muscle Building

Basic Information Form Of HGH Frag 176-191 5mg

Product Name	HGH Frag176-191 5mg
Cas No.	863288-34
Peptide Purity	99.6%
Appearance	White powder
MF	C78H123N23O23S2
MW	1817.1
Shelf Life	2 years
Storage	2-8

What Is HGH Fragment 176-191 5mg

HGH Fragment 176-191, is an analog of the GRF which signals the effects of growth hormone. It is a 15-mer peptide residue of the C-terminus of HGH to which tyrosine is added at the N-terminal end. This synthetically produced hormone is very common to weightlifters and bodybuilders because of a number of physical benefits. Studies claimed that it actually acts on the reduction of excessive adipose tissues such as those in the abdominal area, increase in muscle mass, and enhances the lipid content of the body.

These segments of the synthetic peptide AOD9604 have been researched for their in vivo effects in laboratory mice musculus. Results have shown that AOD9604 have resulted to a short-period increase in blood glucose and a more sustained increase in plasma insulin, together with other fragments such as 172-191, 177-191 and 178-191. In addition, the researchers have suggested that functionality of the peptide depends not only in the informational sequence but should also have the correct physical configuration.

These segments of the synthetic peptide AOD9604 have been researched for their in vivo effects in laboratory mice musculus. Results have shown that AOD9604 have resulted to a short-period increase in blood glucose and a more sustained increase in plasma insulin, together with other fragments such as 172-191, 177-191 and 178-191.

In addition, the researchers have suggested that functionality of the peptide depends not only in the informational sequence but should also have the correct physical configuration (Ng and Borstein 1978). Also, AOD9604, being a region of high accessibility to proteases and also rich in proline, have been demonstrated to affect the conformational change in the cytoplasmic domain of the band 3 of erythrocyte membrane protein by serving as the hinge for the pivoting of the two subdomains. This then suggest that such residue is significant in conformational changes be serving as sites for peripheral protein binding in some body cells (Low et al. 1984).

Benefit Of HGH Frag 176-191 5mg

It has an incredibly ability to regulate fat metabolism without the adverse side effects on insulin sensitivity. By isolating the tail end of the GH molecule, scientist have found that HGH Frag 176-191 works even better than HGH to stimulate lipolysis (breaking down of fat). Also, unlike other fat burning compounds out there, users will not experience hunger suppressing qualities or the jittery feelings. There isn't much to say about the effects of HGH Frag 176-191 other than to say it directly promotes fat loss. Other effect is lowering process if aging, strengthening bones (mineralization) and it leads to an elevated rate of energy expulsion

Feedback Of HGH Frag 176-191 5mg

HBV bodybuilding peptides PT141/ PT 141 10 ..

★★★★★
Really happy with the awesome customer service i was provided by Tracy Zhang. Very friendly and profess onal. Quality product!

Tracy Zhang 27 Jun 2028

Happy to receive your review. Many thanks
