

White Powder Raw Human Growth Hormone Peptides Ghrp-2 CAS 158861-67-

7

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GHRP2
- Minimum Order Quantity: 5 box
- Price: US\$ 43-47/ box
- Packaging Details: 10mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 boxes per month

Product Specification

- Product Name: GHRP2
- CAS No: 158861-67-7
- MF: C46H56N12O6
- MW: 817.9
- Appearance: White Lyophilized Powder
- Shelf Life: 2 Years, When Proper Storage
- MOQ: 5 Box
- Highlight: **Raw Human Growth Hormone Peptides, Ghrp 2 Human Growth Hormone Peptides, GHRP 2 Peptide Powder**

Product Description

White Powder Raw Human Growth Hormone Peptides Ghrp-2 CAS 158861-67-7

Product Details Of GHRP 2 :

Product Name	GHRP 2
Appearance	White powder
Specification	10mg/vial, 10vials/Box
Assay	99.6%
CAS	158861-67-7
MF	C46H56N12O6
Storage	2~8 centigrade

What Is GHRP 2

GHRP-2 (Hormone Releasing Peptide 2) is a hormone secretagogue of the hexapeptide class. Sharing many similarities with GHRP-6, GHRP-2 is the first in this class of hormones, and in many circles, is considered the better choice between it and GHRP-6. It is not a hormone that is often used alone but is almost always used with a Hormone Releasing Hormone (GHRH) such as PEG-MGF.

The compound may also be commonly found under the names Pralmorelin or GHRP Kaken 100. However, in most pharmaceutical and performance based circles, it has in recent years been most commonly referred to as GHRP-2.

Growth hormone releasing peptide-2 (GHRP-2) is in the category of drugs known as GH secretagogues. This category of drugs includes GHRP-2, GHRP-6, Ipamorelin, and Hexarelin. Their primary function is to stimulate the pituitary gland to produce more growth hormone. GHRPs have a 2-fold mechanism of action, in that they cause an increase in GH through amplifying the natural growth hormone releasing hormone (GHRH) signal transduction pathway, as well as by suppressing the actions of somatostatin.

GHRP-2 is a 2nd generation GHRP and finds its primary use in the area of GH release. It is superior to GHRP-6 in this regard and is currently the preferred peptide for attaining maximum elevations in GH over the long-term. Recent research also reveals that GHRP-2 can be dosed much higher than initially thought, while avoiding the desensitization that is inherent in some of our other GHRP's. This provides the user with the opportunity to experience greater elevations in total GH, depending on the dosage administered. Lastly, while GHRP-2 can potentially lead to some degree appetite stimulation, not all users experience this effect and when they do, it is typically much less profound in comparison to GHRP-6.

Difference between GHRP 2 and GHRP 6:

One of the major differences between GHRP 2 and GHRP 6 is that the latter increases hunger in you substantially, especially when you consume the supplement at regular intervals. Therefore, those looking to build muscles and lose excess fat may want to consider GHRP 2 as it is not known to build appetite in you to that extent. However, if your aim is to eat more and grow quickly than GHRP 6 based supplements is for you.

GHRP-2, like other peptides, comes as a freeze dried powder that is very delicate. You can store it in the refrigerator or at room temperature before reconstituting. Once reconstituted with bacteriostatic water, the vials must be stored in a cool dry place like your refrigerator. Insulin syringes are the best way to administer it, usually via subcutaneous injection.

Of course, using GHRP-2 with a GHRH like CJC w/out DAC will give the user the biggest increase in GH and IGF-1 as GHRP's and GHRH's work together synergetically. The average dosing for GHRP-2 is 100-200mcg two to three times daily.

For best results many athletes using GHRP2 along with growth hormone (HGH). For example, as soon as woke up from 2-5iu of growth hormone. During the day, 2-3 injections of GHRP2 are strictly before meals.

Feedback Of GHRP 2
