

99% Purity Body Building Peptides Hgh Frag 176 Powder For Fat Loss

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Fragment(176-191)
- Minimum Order Quantity: 5 boxes
- Price: US\$ 65-69/ box
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Hgh Frag 176-191
- Appearance: White powder
- Specification: 5mg/vial, 10vials/box
- Application: Bodybuilding
- MW: 1815.08152
- Assay: HPLC 99%
- MF: C78H123N23O23S2
- Highlight: **Hgh Frag 176 Powder, Fat Loss Hgh Frag 176, 99% Body Building Peptides**

Product Description

White Powder 99% Purity Body Building Peptides Hgh Frag 176 For Fat Loss

Basic Information Form:

Product Name	Hgh Frag 176-191
Cas No.	66004-57-7
Assay	99%
Appearance	White powder
MF	C78H123N23O23S2
Shelf Life	2 years
Attention Terms	2-8

Brief Introduction of Hgh Frag 176

This fragment is a modified form of amino acids 176-191 at the c-terminal region of the hgh. Studies have shown that it works by mimicking the way of natural hgh regulates fat metabolism but without the adverse effects on insulin sensitivity (blood sugar) or cell proliferation (muscle growth) that seen with unmodified. This HG fragment 176-191 stimulates lipolysis (breaking down of fat) and inhibits lipogenesis (the formation of fatty acids and other lipids in the body).

There is no question why modern bodybuilders utilize this product, its ability to regulate fat loss, pack on size and increase clenbuterol). Multiple studies have shown that frag 176-191 will not cause hyperglycemia. In addition, it will promote lean body mass,protein synthesis, increase bone mineral density, and better sleep.

Application of Hgh Frag 176

The hgh frag 176 stimulates lipolysis and inhibits lipogenesis both en vivo/en vitro.

hgh frag 176 has shown no effect on growth or insulin resistance, unlike the full GH molecule. This is the newest, most powerful GH fragment on the market. Studies have shown sustained fatloss, aimed directly at adipose tissue.

It has been shown that the fat-reducing effects of GH appear to be controlled by a small analog region of the C-terminus end of the GH molecule. This region consists of amino acids 176-191, thus the name. This peptide fragment works by mimicking the way natural hGH regulates fat metabolism but without the adverse effects on blood sugar that is seen with unmodified HGH.

Function of Hgh Frag 176

The stimulates lipolysis and inhibits lipogenesis both en vivo/en vitro.

Hgh frag 176 has shown no effect on growth or resistance, unlike the full GH molecule. This is the newest, most powerful GH fragment on the market. Studies have shown sustained fatloss, aimed directly at adipose tissue.

Hgh frag 176 has been shown that the fat-reducing effects of GH appear to be controlled by a small analog region of the C-terminus end of the GH molecule. This region consists of amino acids 176/191, thus the name. HGH Frag176-191 works by mimicking the way natural hGH regulates fat metabolism but without the adverse effects on blood sugar that is seen with unmodified HGH.

Feedback of hgh frag 176
