

White Powder High Purity High Frag 176-191 Body Building Fat Loss Peptide

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Frag176-191
- Minimum Order Quantity: 5 boxes
- Price: US\$ 113-119/ box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Fat Loss Peptide Hgh Frag 176-191
- CAS: 863288-34
- Molecular Formula: C78H123N23O23S2
- Molecular Weight: 1817.1
- Appearance: White Powder
- Storage: 2-8
- Specification: 10mg/vial, 10vials/box
- Highlight: **863288-34 Fat Loss Peptide, Frag 176-191 Fat Loss Peptide, Bodybuilding Hgh Frag 176-191 Powder**

Product Description

White Powder High Purity Hgh Frag 176-191 Body Building Fat Loss Peptide

Basic Information Form Of Fat Loss Peptide Hgh Frag 176-191

Product Name	Fat Loss Peptide Hgh Frag 176-191
Cas No.	863288-34
Molecular Formula	C78H123N23O23S2
Molecular Weight	1817.1
Peptide Purity	99%
Appearance	White powder
Storage	2-8
Shelf Life	2 years

What is Fat Loss Peptide Hgh Frag 176-191

HGH fragment 176-191 is also known as Growth Hormone Peptide frag 176-191. It is a form of modified amino acids containing 16 growth hormones starting from numbers 176-191. Research has shown that this group of growth hormones greatly contributes to fat loss in the body .

HGH fragment 176-191 makes up less than 10% of the overall size of the Growth Hormone molecule . It mimics the way natural GH molecules works by regulating fat metabolism, with the exception that it does not cause any adverse effects on growth or blood sugar levels.

HGH Fragment 176-191 has been shown to contribute to lipolysis a process that aids in the breakdown and elimination of fat from the body. Growth hormones are produced by the pituitary. The process of making HGH Frag 176-191 occurs in the laboratory, where a synthetic version of the Growth Hormone is produced. This is to elevate the levels of GH fragments, which have long been associated with the process of losing fat in the body .

HGH Frag 176 through research studies on mice and rats has been shown to have effects such as anti-ageing effects, recovery and a wide range of other health benefits.

Effects of Fat Loss Peptide Hgh Frag 176-191

This peptide has been studied since the 1970s, but its uses as a weight loss and fat control compound weren't confirmed until the early 1980s. Frag176-191 affects adipose tissue to increase muscle growth and recovery, inhibit the growth of lipids and fatty acids, improve bone strength, and regulate sleep patterns.Studies have shown that HGH Frag176-191 is one of the most effective compounds when it comes to reducing fat and inhibiting the formation of lipids and fatty acids.

- 1.Aids in weight and fat control
- 2.Inhibits growth of lipids and fatty acids
- 3.Improves bone strength
- 4.Regulates sleep patterns
- 5.Speeds muscle recovery

Feedback And Reviews of Fat Loss Peptide Hgh Frag 176-191
