

## 99% Purity Fat Burner GH Frag 176-191 Peptide White Powder

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GH Frag 176-191
- Minimum Order Quantity: 5 boxes
- Price: US\$ 114-118/ box
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

#### Product Specification

- Name: Gh Frag 176-191
- MF: C78H123N23O23S2
- Molecular Weight: 1817.1
- Appearance: White Powder
- Specification: 10mg/vial, 10vials/box
- CAS: 863288-34
- Storage: 2-8
- Highlight: **Frag 176-191 Peptide Powder, Fat Burner 176-191 Peptide, 99% Purity HGH Frag 176-191**

## Product Description

### Factory Price 99% Purity Frag Fat Burner gh 176-191

#### Informations Of Frag Fat Burner

|                |                 |
|----------------|-----------------|
| Product Name   | Frag Fat Burne  |
| Cas No.        | 863288-34       |
| MF             | C78H123N23O23S2 |
| MW             | 1817.1          |
| Appearance     | White powder    |
| Peptide Purity | 99%             |
| Storage        | 2-8             |
| Shelf Life     | 2 years         |

#### What is Frag Fat Burne

GH Frag 176 191, is a modified form of amino acids 176-191 of the GH polypeptide. The fat-reducing effects of GH appear to be controlled by a small region near one end of the Growth Hormone molecule. This region, which consists of amino acids 176-191, is less than 10% of the total size of the GH molecule and no effect on growth or insulin resistance. It works by mimicking the way natural Growth Hormone. Regulating fat metabolism but without the adverse effects on blood sugar or growth that is seen with unmodified Growth Hormone. The gH fragment 176-191 stimulates lipolysis and inhibits lipogenesis, the transformation of nonfat food materials into fat) both in laboratory testing. GH Frag 176/191

Fragment 176-191 (modified version of AOD9604) is a small piece of GH that is sometimes referred to as the "lipolytic fragment." Fragment 176-191 earned this latter name due to the fact that laboratory research has shown it to enhance fat burning, particularly in mice genetically engineered to produce large fat stores. Fragment 176-191 has been heavily researched in animal models because even while it preserves the fat-burning effects of GH, it avoids some other effects of its parent protein such as increasing insulin-like growth factor-1 (IGF-1) levels, negatively impacting carbohydrate metabolism, altering insulin sensitivity, increasing long bone growth, and so forth. The targeted effects of fragment 176-191 make it useful for exploring human fat metabolism and may eventually provide the basis for developing anti-obesity medications.

#### Effects of Frag Fat Burne

1. Stimulates lipolysis
2. Boosts the ability to burn fat
3. Boosts energy levels
4. Increases bone density
5. Offers anti-aging benefits
6. Helps with weight loss
7. Improves muscle recovery
8. Does not increase glucose or insulin levels

#### Customer Feedback And Reviews

HBV bodybuilding peptides PT-141/ PT 141 10...

★★★★★

Really happy with the awesome customer service I was provided by Tracy Zhang. Very friendly and professional. Quality product!
