

CAS 66004-57-7 Frag 191 Body Building Peptides For Muscle Mass

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Fragment Peptide
- Minimum Order Quantity: 3box
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box; 5mg/vial, 10vials/box; 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 3000kg/Month

Product Specification

- Name: Frag 191 Powder
- CAS: 66004-57-7
- Assay: 99%
- Appearance: White Powder
- MF: C78H123N23O22S2
- Storage: Peptides Should Be Refrigerated At 4°C Or Below For A Period Of Up To 3 Months. To Prolong The Life Span Of The Peptides They May Be Placed In A Freezer For Up To 12 Months. Once Reconstituted Peptides Should Be Refrigerated/stored At 4°C For Up To 30 Days
- Specification: 2mg/vial, 10vials/box 5mg/vial, 10vials/box 10mg/vial, 10vials/box
- MOQ: 3box
- Highlight: **Muscle Mass Frag 191 Peptides, 66004-57-7 Frag Peptide, Muscle Mass Hgh Frag Peptide**

Product Description

What is factory direct peptides frag 191 powder dosage usage for Mucle Mass?

Basic Information Form:

Product Name	factory direct peptides frag 191 powder dosage usage for Mucle Mass
CAS NO.	66004-57-7
MF	C78H123N23O22S2
EINECS NO.	unavailable
Purity	99%
Appearance	White powder
Place of origin	China
MOQ	3box
Storage	STable at room Tempurature for 90 days. Best stored in freezer

Brief Introduction of Frag 191 powder

HGH Fragment 176-191 has been shown to contribute to lipolysis a process that aids in the breakdown and elimination of fat from the body. Growth hormones are produced by the pituitary. The process of making HGH Frag 176-191 occurs in the laboratory, where a synthetic version of the Growth Hormone is produced. This is to elevate the levels of GH fragments, which have long been associated with the process of losing fat in the body.

Growth Hormone peptide fragment 176-191, also known as HGH Frag 176-191, is a modified form of amino acids 176-191 of the GH polypeptide.

The (hgh fragment 176-191) exhibits the ability to burn through stubborn adipose tissue, while increasing energy expenditure, muscle mass, and fat oxidation. All studies have pointed to the fact that the fragment is an effective treatment for obesity and fat loss, and much safer than its Human Growth Hormone counterpart.

Function of Frag 191 Powder

1. Increase in muscle mass
2. Enhances the lipid content of the body.
