

99% Assay BodyBuilding Liraglutide Victoza For Chronic Weight Management

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Liraglutide
- Minimum Order Quantity: 5 boxes
- Price: negotiable
- Packaging Details: 3mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 20000 boxes/month

Product Specification

- Item: Victoza
- Assay: 99% Assay
- CAS: 204656-20-2
- Specification: 3mg
- Synonyms: Victoza; Liraglutida; Liraglutidum
- Outlook: Crystalline Powder
- Chemical Names: H-His-Ala-Glu-Gly-Thr-Phe-Thr-Ser-Asp-Val-Ser-Ser-Tyr-Leu-Gly-Gln-Ala-Ala-Lys(1)-Glu-Phe-Ile-Ala-Trp-Leu-Val-Arg-Gly-Arg-Gly-OH.palmitoyl-Glu(1)-OH
- Molecular Formula: C172H265N43O51
- Application: Used As A Treatment For Type 2 Diabetes, Obesity, And Chronic Weight Management.
- Molecular Weight: 3751.262

Product Description

99% Assay BodyBuilding Liraglutide Victoza For Chronic Weight Management

What is Liraglutide ?

Victoza is a medication used in addition to diet and exercises for adults with type 2 diabetes and children 10 years of age and older.

Victoza usage:

1. Alone when metformin (another medication for type 2 diabetes) is not recommended;
2. As an "add-on" to other diabetes medications.
3. Victoza contains the active substance liraglutide.
4. Used as a treatment for type 2 diabetes, obesity, and chronic weight management.

How does Victoza work?

Type 2 diabetes is a disease in which the pancreas does not make enough insulin to control the level of glucose (sugar) in the blood or when the body is unable to use insulin effectively. The active substance in Victoza, liraglutide, is an 'incretin mimetic'. This means that it acts in the same way as incretins (hormones produced in the gut) by increasing the amount of insulin released by the pancreas in response to food. This helps with the control of blood glucose levels.

Victoza (liraglutide) is a glucagon-like peptide-1 (GLP-1) receptor agonist. By activating the GLP-1 receptor this medication tells your body to release more insulin, stops the body from releasing more sugar, and slows down digestion.

Basic Information of 99% Assay BodyBuilding Liraglutide Victoza For Chronic Weight Management

Item	99% Assay BodyBuilding Liraglutide Victoza For Chronic Weight Management
CAS no.	204656-20-2
MF	C172H265N43O51
Specification	3 mg
Purity	99%
form	Crystalline powder
Origin	China
MOQ	5 boxes
Storage	Cool dry place

Does Victoza help people with diabetes lose weight?

Victoza has been shown to help patients to achieve weight loss by increasing satiety (feeling of fullness) and delaying gastric emptying, therefore reducing the intake of calories.

Weight gain is a common side-effect of type 2 diabetes treatments, and weight loss is an important goal.

How long can you stay on Victoza (liraglutide)?

There is no time limit for the use of Victoza (liraglutide). Most people will stay on Victoza (liraglutide) as long as they can tolerate the side effects and their doctor sees a benefit.

What time of day should Victoza (liraglutide) be taken?

Victoza (liraglutide) can be taken at any time during the day with or without food. It should be injected at the same time every day, so you should pick a time of day that works best with your schedule.

Typical dosing for Victoza (liraglutide)

The typical starting dose of Victoza (liraglutide) is 0.6 mg once daily, injected into the stomach, thigh, or upper arm. After at least a week, your doctor may increase the dose to 1.2 mg or 1.8 mg if needed.
