Tissue Repair Thymosin Beta 4 10mg/Vial-TB500 Thymosin β 4 Synthetic

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC, MS,COA
- Model Number: HBY-TB 500
- Minimum Order Quantity: 5 boxes
- Price: Negoitable
- Packaging Details: 5mg/10mg/vial,10vials/box
- Delivery Time: Receive advance payment, within 3-5 days
- Payment Terms: Paypal, L/C, ,Western Union, T/T
- Supply Ability: 20,000boxes/per month

Product Specification

- Chemical Formula: C38H67N9O15
- Packing: 1mg/vial
- Shelf Life: 2 Years
- Molecular Weight: 4963.4406
- Molar Mass: 890
- Appearance: White Lyophilized Powder
- CAS Number: 885340-08-9
- Expiry Date: 2022-12-31
- Highlight: **Tissue Repair Thymosin Beta 4**, **Thymosin Beta 4 10mg/Vial**, **TB500 Thymosin B 4 Synthetic**

Product Description

Product Description:

What is TB-500?

TB-500 is a synthetic alternative to the natural regenerative peptide, thymosin-beta-4 (TB4). This peptide is composed of 43 amino acids and is responsible for managing the wound-healing process. Specifically, it works to reduce inflammation, cellular damage, and infection by regulating cell migration and promoting blood vessel growth. Furthermore, when released by platelets and macrophages, it helps protect the body from damage.

TB-500 is sustained biologically from TB4, and both are linked to a range of positive therapeutic effects evaluated in clinical studies. These include improved healing for all types of tissues, anti-aging properties, and cardiovascular benefits. The therapeutic benefits of TB4 are being further investigated to treat numerous cardiometabolic and inflammatory conditions, such as myocardial infarction, ulcerative colitis, keratitis, and renal fibrosis.

Features:

Product Name: TB 500 Peptide

Appearance: White Lyophilized Powder

Shipping Method: DHL/UPS/FedEx/TNT/EMS

Packing: 1mg/vial

Molecular Weight: 4963.4406

CAS Number: 885340-08-9

TB 500 Benefits: Promotes tissue repair, increases muscle growth, reduces inflammation, and facilitates hair growth.

Applications:

What Does TB-500 Do?

Though much more research has been done on TB4, researchers and clinicians believe that TB-500 is essentially identical in terms of functionality. Thus, research on the therapeutic effects of TB4 can theoretically be applied to both.

TB4 has been gaining attention due to its numerous established anti-inflammatory, anti-fibrotic, and protective abilities throughout the body. It heightens vascular endothelial growth factor (VEGF) and actin production, both of which are integral in the healing process as they promote angiogenesis and cell migration. TB4's capacity to repair cardiac and neural tissue following ischemic events is exciting to clinicians.

Furthermore, TB4 modulates cytokine levels to significantly reduce oxidative stress and attenuate fibrosis in order to enhance healing. It also possesses the potential to treat various types of organ injury and inflammatory bowel disease due to its anti-inflammatory nature. More broadly, TB4 and TB-500 may contribute to the overall stability of connective tissue and cardiovascular systems, even in the absence of healing.

2. TB 500 Benefits
TB 500 has other benefits as well. It can increase hair growth and even improve your endurance. Some people prefer to use TB 500 for these reasons alone. Other people find that TB 500 benefits them when they get injured. It has healing properties that reduce inflammation, thereby decreasing pain. Many people have chronic inflammation from illnesses and seek a healthy treatment option.

Some have noted that they get more strength when using TB 500 because it increases muscle growth. As we get older, That means we become weaker, so a natural way to stay strong is through the use of TB 500.

TB 500 can also be used to treat blood clots and reduce the effects of Lyme disease. Some have seen improvements in autoimmune conditions that don't respond to other treatments.

Dosage of TB 500

In order to get the full benefits from TB 500, you will need to take it as an injection. In some cases, you can do this on your own, or you can have a medical professional do it if it is more comfortable for you.

Your dose of TB 500 can vary depending on different factors. You should start with a small dose so that your body can adjust to it.
Many times, the initial dose of TB 500 peptide will be between four and ten milligrams. In the beginning, you may take it one to two times a week. After the initial dose, you will probably see the benefits of TB 500.

You need to make sure that you have the guidance of a medical professional. They are the experts who can oversee the dosage of TB 500 to ensure you are getting the right amount. The dose that you get will depend on your injury and how fast it heals.

You do need to know that you have to reconstitute the TB 500 before you can take it. This means you will need to add water or saline to mix it in. You will need a syringe, like the one you use to inject insulin.

After you fill the syringe, you will inject one millimeter into the TB 500. Make sure you take your time when injecting so that the water slides down the side of the bottle.

3. Injecting TB 500

Once you have decided to use TB 500, you need to know how to inject it to get the best results. You don't want an injury to keep you from getting your workout in. Moving your body is a great way to manage stress and your health.

You can get a dose of TB 500 by intramuscular injection, intravenous injection, or subcutaneous injection. You will need a clean alcohol swab to clean the injection site and the bottle. This should be done each time you use TB 500 to prevent bacterial contamination.

Whichever method you choose to inject TB 500, you should get it as close to the injury site as possible. Intramuscular injections can be a challenge. To use this method, you must insert the needle into the actual muscle near the pain.

When using the subcutaneous method, you pinch the skin in the area you choose to inject. Then you insert the needle through that membrane. These do not cause much pain and feel more like a mild tingle.

You insert the needle into a vein when you use the intravenous method. This can be in the hand, arm, or wrist. In most cases, the IV must be done under the direct supervision of a physician.

If the use of TB500 is not related to an injury, most people will find an area of comfort. If you want to use it to treat systemic inflammation, you can inject it anywhere to get the benefits.

Customization:

TB 500 Peptide Customization Service

Brand Name: Hongbaiyi
Model Number: HBY-TB 500
Place of Origin: China
Certification: HPLC, MS, COA
Minimum Order Quantity: 5 boxes
Price: Negotiable
Packaging Details: 5mg/10mg/vial,10vials/box
Delivery Time: Receive advance payment, within 3-5 days
Payment Terms: Paypal, L/C, , Western Union, T/T
Supply Ability: 20,000boxes/per month
Shipping Method: DHL/UPS/FedEx/TNT/EMS
Product Name: TB 500 Peptide
CAS No.: 77591-33-4
Appearance: White Lyophilized Powder
Source: Synthetic
TB 500 Supplement and Thymosin Beta 4

TB 500 Peptide is a supplement that contains the active ingredient thymosin beta 4, which is a type of protein found in human and animal tissues. It is known for its role in promoting wound healing, muscle growth, and cell regeneration.
It has been used for various therapeutic purposes, such as treating multiple types of wounds, muscle injuries, and joint pain. It may also help boost the immune system and reduce inflammation.
It is available in various forms, such as tablets, capsules, and injections. It can also be combined with other supplements, such as omega-3 fatty acids and antioxidants.
If you are looking for a TB 500 supplement to help promote healing and boost your overall health, consider giving Hongbaiyi's TB 500 Peptide a try. We offer HPLC, MS, and COA-certified customizations with a minimum order quantity of 5 boxes. Our prices are negotiable, so don't hesitate to contact us for more information.
We guarantee the fastest delivery time upon receiving the advance payment and can supply up to 20,000 boxes per month. We also offer various shipping methods, such as DHL, UPS, FedEx, TNT, and EMS.

Packing and Shipping:

Packaging and Shipping for TB 500 Peptide:
TB 500 Peptide is packaged in an amber vial with a capacity of 10 mg. It is sealed and shipped in a box with padding material to ensure safe delivery.

FAQ:

.

Q1: What is Hongbaiyi TB 500 Peptide?

A1: Hongbaiyi TB 500 Peptide is a synthetic peptide that supports healing and repair of injured muscle fibers and connective tissues, and is used for athletic performance and recovery.

Q2: What is the Brand Name of Hongbaiyi TB 500 Peptide?

A2: The Brand Name of Hongbaiyi TB 500 Peptide is Hongbaiyi.

Q3: What is the Model Number of Hongbaiyi TB 500 Peptide?

A3: The Model Number of Hongbaiyi TB 500 Peptide is HBY-TB 500.

Q4: What is the Place of Origin of Hongbaiyi TB 500 Peptide?

A4: The Place of Origin of Hongbaiyi TB 500 Peptide is China.

Q5: What is the Certification of Hongbaiyi TB 500 Peptide?

A5: The Certification of Hongbaiyi TB 500 Peptide is HPLC, MS,COA.
