# 2 Years Shelf Life Tb 500 Injection Highly Soluble Thymosin Beta 4 Easily Diluted

Our Product Introduction

## Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC, MS,COA
- Model Number: HBY-TB 500
- Minimum Order Quantity: 5 boxes
- Price: Negoitable
- Packaging Details: 5mg/10mg/vial,10vials/box
- Delivery Time: Receive advance payment, within 3-5 days
- Payment Terms: Paypal, L/C, ,Western Union, T/T
- Supply Ability: 20,000boxes/per month

## Product Specification

- Source: Synthetic
- Molecular Formula: C212H350N56O78S
- Appearance: White Lyophilized Powder
- Molecular Weight: 4963.4406
- CAS No.: 77591-33-4
- Solubility: It Is Recommended To Reconstitute The Lyophilized TB-500 In Sterile 18MΩ-cm H2O Not Less Than 100µg/ml, Which Can Then Be Further Diluted To Other Aqueous Solutions.
- Shelf Life: 2 Years
- Molar Mass: 890
- Highlight: **2 Years Shelf Life Tb 500 Injection**, **Tb 500 Injection Highly Soluble**,

## Product Description

### Product Description:

So, what is TB-500? TB-500 is a synthetic analog of thymosin-beta-4 (TB4), a natural regenerative peptide for most animal and human cells. TB4 enhances the healing process in animals and humans by regulating cell movement and actively promoting blood vessel growth. It also reduces the risk of inflammation, cellular damage, and infection, due to its secretion and slow release by platelets and macrophages post-injury.
TB-500 preserves the biological activity of TB4 and thus has been significantly tied to many clinical studies which demonstrate therapeutic effects. This includes improved healing of tissue types, anti-aging effects, and even cardiovascular benefits. TB4 is currently being explored as a possible method of treating various diseases involving cardiometabolic and inflammation, such as myocardial infarction, ulcerative colitis, and renal fibrosis.

### Features:

Product Name: TB 500 Peptide
Molecular Weight: 4963.4406
Purity: 99%
Molar Mass: 890
Packing: 1mg/vial
Expiry Date: 2022-12-31
A TB 500 Supplement
TB 500 Peptide for Sale

### Applications:

What does TB-500 do? Researchers and clinicians believe that TB-500 is functionally identical to TB4, and so research on the therapeutic effects of TB4 may be applied to both. TB4 has been associated with anti-inflammatory, anti-fibrotic, and protective effects throughout the body, due to its ability to upregulate vascular endothelial growth factor (VEGF) and actin to promote angiogenesis and cell migration. It also modulates cytokine levels, potentially reducing oxidative stress and fibrosis. Clinically, this makes TB4 and TB-500 interested in treating cardiac and neural ischemic events, as well as potential treatments for liver, kidney, and heart injury and inflammatory bowel disease. Lastly, TB4 and TB-500 may have a role in maintaining the overall integrity of cardiovascular and connective tissue.

### Customization:

Are you looking for **TB 500 Peptide**? Hongbaiyi offers the highest quality **TB 500 Supplement** in the market. Our TB 500 Thymosin Beta 4 is 99% pure according to HPLC, MS, and COA certifications. It has a molecular weight of 4963.4406, a molecular formula of C212H350N56O78S, and a CAS number of 885340-08-9.
We guarantee a shelf life of 2 years and a minimum order quantity of 5 boxes. Prices are negotiable and delivery is within 3-5 days of receiving advance payment. Payment can be made with Paypal, L/C, , Western Union, or T/T. We can offer up to 20,000 boxes per month.
Packaging is available in 5mg/10mg/vial, 10 vials/box. For more information, please contact us today.

### Packing and Shipping:

Packaging and Shipping for TB 500 Peptide
TB 500 peptide is packaged in a light-resistant vial and shipped in an insulated box. The vial is wrapped in bubble wrap and sealed with a tamper-proof seal.
The insulated box is filled with an inert gas to protect the peptide from damage during shipping. The box is lined with thermal insulation material to keep the peptide at a consistent temperature.
The insulated box is then placed in a shipping box and sealed with heavy-duty tape. The shipping box is then labeled with the recipient's address.
The package is then shipped via an express shipping service to ensure that it is delivered quickly and securely.

### FAQ:

Q1: What is TB-500 Peptide?
A1: TB-500 Peptide, produced by Hongbaiyi, is a synthetic peptide version of Thymosin Beta-4. It is designed to promote joint and muscle recovery.
Q2: What is the model number of TB-500 Peptide?
A2: The model number of TB-500 Peptide is HBY-TB 500.
Q3: Where is TB-500 Peptide made?
A3: TB-500 Peptide is made in China.
Q4: What certifications does TB-500 Peptide have?
A4: TB-500 Peptide is certified by HPLC, MS, and COA.
Q5: How much does TB-500 Peptide cost?
A5: The price of TB-500 Peptide is negotiable. The minimum order quantity is 5 boxes, and each pack contains 10 vials of 5mg/10mg.
