

## 1-500g 98% High Purity Acetyl Tetrapeptide-9 CAS 928006-50-2 For Anti-Age

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC
- Model Number: HBY-Acetyl Tetrapeptide-9
- Minimum Order Quantity: 1-500g
- Price: Negotiable
- Packaging Details: 1-500g /plastic bottle
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000kg per month

### Product Specification

- INCI Name: Acetyl Tetrapeptide-9
- Gas No.: 928006-50-2
- Recommended Use Level: 100-1000PPM
- Storage: Keep In Dark And Cool Dry Place (-5 To 8°C)
- Appearance: White To Off-white Powder
- Odor: Slightly Characteristic Odor
- Theoretical MW: 539.54
- Purity (HPLC): ≥95.0%
- Applications: Anti-age
- Function: Action On Dermal Structure Via Stimulation Of Lumican And Collagen Synthesis. It Creates A Global Restructuring Of The Skin Matrix
- Highlight: **Acetyl Tetrapeptide-9 Cosmetic Peptide, 98% Purity Acetyl Tetrapeptide-9, Acetyl Tetrapeptide-9 Anti Age**

## Product Description

1-500g 98% High Purity Acetyl Tetrapeptide-9 CAS 928006-50-2 For Anti-Age

### Basic Information of Acetyl Tetrapeptide-9 Peptide:

|                       |                           |
|-----------------------|---------------------------|
| INCI Name             | Acetyl Tetrapeptide-9     |
| Cas No.               | 928006-50-2               |
| Recommended use level | 100-1000PPM               |
| Appearance            | White to off-white powder |
| Purity (HPLC)         | ≥95.0%                    |
| Applications          | Anti-age                  |
| MOQ                   | 1g                        |
| Storage               | -5 to 8°C                 |

#### 1. What is Acetyl Tetrapeptide-9 Peptide?

Acetyl Tetrapeptide-9 Peptide is a synthetic peptide that is composed of four amino acids: acetyl glutamine, aspartic acid, valine, and histidine. It is a signaling peptide, which means that it sends signals to cells to perform certain functions.

Acetyl Tetrapeptide-9 is commonly used in skincare products to improve the appearance of aging skin. It can help to reduce wrinkles, fine lines, and crow's feet. Acetyl Tetrapeptide-9 can also help to improve skin tone and texture and to reduce the appearance of pores.

Acetyl Tetrapeptide-9 works by stimulating the production of extracellular matrix proteins, such as collagen and lumican. These proteins are essential for maintaining skin structure and elasticity. Acetyl Tetrapeptide-9 also has anti-inflammatory properties, which can help to reduce skin redness and irritation.

Acetyl Tetrapeptide-9 is generally considered to be safe for most people to use. However, it is important to do a patch test on a small area of skin before using any new skincare product, to make sure that you are not allergic.

In addition to its skincare applications, Acetyl Tetrapeptide-9 is also being researched for other potential applications, such as wound healing, hair loss prevention, skin cancer prevention, and acne treatment. However, more research is needed to confirm these potential benefits.

#### 2. How does Acetyl Tetrapeptide-9 work?

Acetyl Tetrapeptide-9 works by stimulating the production of extracellular matrix proteins, such as collagen and lumican. These proteins are essential for maintaining skin structure and elasticity. Acetyl Tetrapeptide-9 also has anti-inflammatory properties, which can help to reduce skin redness and irritation.

#### 3. Applications of Acetyl Tetrapeptide-9

Acetyl Tetrapeptide-9 is commonly used in skincare products to improve the appearance of aging skin. It can help to reduce wrinkles, fine lines, and crow's feet. Acetyl Tetrapeptide-9 can also help to improve skin tone and texture and to reduce the appearance of pores.

#### 4. Other applications of Acetyl Tetrapeptide-9

Acetyl Tetrapeptide-9 is also being researched for other potential applications, such as:

- Wound healing
- Hair loss prevention
- Skin cancer prevention
- Acne treatment

However, more research is needed to confirm these potential benefits.

Acetyl Tetrapeptide-9 is generally considered to be safe for most people to use. However, it is important to do a patch test on a small area of skin before using any new skincare product, to make sure that you are not allergic.
