

Premium Ferric Carboxymaltose API Solution Therapy Soluble In Water Powder

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC
- Model Number: HB-Y-Ferric Carboxy Maltose
- Minimum Order Quantity: 1 kg
- Price: Negotiable
- Packaging Details: 25kg/bag or follow customer's packing instructions
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 300,000 Kilograms

Ferric Carboxy Maltose

Product Specification

- Name: Ferric Carboxy Maltose
- Molecular Formula: $(C_6H_{10}O_6)_n \cdot [Fe(OH)_3] \cdot xH_2O$
- CAS NO.: 9007-72-1
- PH Range: 5.5 - 7.5
- Solubility: Soluble In Water
- Iron Content: Approximately 50 Mg/mL
- Appearance: Brown, Colloidal Solution
- Storage: Store At Room
- Highlight: **Powder Ferric Carboxymaltose API Solution, Premium Ferric Carboxymaltose API Solution**

Product Description

Shannxi Hongbaiyi Biotech's Ferric Carboxy Maltose Powder is a premium solution meticulously crafted to address iron deficiency anemia with unparalleled efficacy.

Our product, a complex of iron(III) hydroxide and carboxy maltose, stands as a beacon of innovation in intravenous iron replacement therapy. Formulated to exacting standards, each batch undergoes rigorous quality control measures to ensure purity, stability, and optimal therapeutic efficacy.

With a rich brown hue indicative of its iron content, our Ferric Carboxy Maltose Powder is easily soluble in water, offering convenience and versatility in administration.

Ideal for adults with chronic kidney disease or inflammatory bowel disease who require iron supplementation when oral intake is insufficient or intolerable.

Trust in Shannxi Hongbaiyi Biotech for a reliable source of Ferric Carboxy Maltose Powder, designed to empower healthcare professionals in their mission to improve patient outcomes. Experience the epitome of pharmaceutical excellence with our esteemed product.

Basic Specification

Parameter	Value
Name	Ferric carboxymaltose
Formula	$(C_6H_{10}O_6)_n \cdot [Fe(OH)_3] \cdot xH_2O$
MW	Variable
CAS Number	9007-72-1
Appearance	Brown, colloidal solution
Solubility	Soluble in water
Iron Content	~50 mg/mL
pH Range	5.5 - 7.5
Storage	Store at room temperature away from light and moisture
Stability	Stable under recommended storage conditions
Therapeutic Use	Treatment of iron deficiency anemia in adults with chronic kidney disease inflammatory bowel disease
