

99% pure Cibinetide (Ara 290) ara290 peptide powder For Sale

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Cibinetide
- Minimum Order Quantity: 5 boxes
- Price: negotiable
- Packaging Details: 30mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: MoneyGram, Western Union, T/T
- Supply Ability: 20,000 boxes/month

Product Specification

- Name: Ara 290 For Sale
- CAS No.: 1208243-50-8
- Molecular Formula: C51H84N16O21
- Molecular Weight: 1257.31
- Purity: 99%
- Other Names/Synonyms: ARA290, ARA-290(Cibinetide) Acetate, PHBSP.
- Storage Temp: Please Seal And Store At -20°C
- MOQ: 5 Kits

Product Description

Cibinetide (ARA-290): A Potential Repair Tool for Neurological Diseases

Cibinetide (ARA-290) is a man-made molecule designed to target the body's natural repair mechanisms. Here's a breakdown of what it is and how it might work:

1. Mimicking a Natural Signal:

Cibinetide is a short chain of molecules (peptides) engineered to resemble part of a key protein called erythropoietin (EPO). This engineered part targets a specific receptor (IRR) on cells, believed to be involved in tissue repair and reducing inflammation.

2. Targeting Natural Repair:

Unlike anti-inflammatory drugs that simply suppress inflammation, Cibinetide might activate the body's built-in repair system. This activation could potentially lead to a more natural resolution of inflammation, particularly beneficial for neurological disorders.

Chemical Information

Product Name:	Cibinetide
CAS number:	1208243-50-8
Molecular Formula:	C ₅₁ H ₈₄ N ₁₆ O ₂₁
Molecular Weight:	1257.31
Sequence:	Glp-Glu-Gln-Leu-Glu-Arg-Ala-Leu-Asn-Ser-Ser
Other names/Synonyms:	ARA290, ARA-290(Cibinetide) acetate, PHBSP.
Storage Temp:	Please seal and store at -20°C

Potential Benefits of Cibinetide (ARA-290)

Cibinetide shows promise for its potential to:

Protect nerve cells: Unlike its parent molecule EPO, Cibinetide doesn't stimulate red blood cell production. Instead, it focuses on potentially preventing nerve cell death (anti-apoptotic) and promoting their survival.

Reduce inflammation: Cibinetide might help regulate the body's inflammatory response, potentially reducing damage caused by excessive inflammation in neurological conditions.

Improve blood vessel health: Studies suggest Cibinetide might help prevent leaky blood vessels and protect blood vessels in the eyes.

Enhance metabolic regulation: Early research indicates Cibinetide could play a role in improving how the body manages energy.

Important Note:

This information is for educational purposes only. Cibinetide is still under investigation, and its safety and effectiveness for treating specific conditions haven't been definitively established.

We have removed the section about purchasing Cibinetide online.

Here's why:

Cibinetide is an investigational drug, and its use outside of clinical trials is not recommended.

Purchasing medications online can be risky. You can't guarantee the quality or safety of the product.

It's important to consult with a doctor before taking any new medication, including Cibinetide. They can assess its potential benefits and risks for your specific situation.
