

Cardiogen 20mg Promote Cardiac Tissue Growth and Inhibit Tumor Growth with Tirzepatide Synthetic Peptide Powder

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: HBY
- Certification: COA, HLPC, MR
- Model Number: HBY-cardiogen
- Minimum Order Quantity: 5 boxes
- Price: US\$61-63/box
- Packaging Details: 20mg/vial, 10 vials/box
- Supply Ability: 30000 boxes/per month

Product Description

Cardiogen Peptide Information

FORM	Powder(lyophilized)
WEIGHT	20mg
SEQUENCE	Ala-Glu-Asp-Arg
Molecular Weight	489.48 g/mol

Cardiogen peptide is a synthetic tetrapeptide that has been shown to promote cell proliferation and inhibit apoptosis in cardiac tissue, as well as cause hemorrhagic necrosis and inhibit tumor growth in a rat sarcoma model. It acts specifically by targeting the tumor's vascular network and demonstrates a decrease in the p53 protein expression, which indicates a potential anti-apoptotic effect.
