

Chonluten is a short peptide, also known as T-34 or EDG tripeptide, composed of glycine, glutamine, and asparagine.

Basic Information

- Place of Origin: China
- Brand Name: HBY
- Certification: COA, HLPC, MR
- Model Number: HBY T-34
- Minimum Order Quantity: 5 boxes
- Price: US\$50.72-52/box
- Packaging Details: 20mg/vial, 10 vials/box
- Supply Ability: 30000 boxes/per month

Product Description

Chonluten is a short peptide bioregulator of gene expression. Research has shown it to be most active in lung tissue with secondary levels of activity in the GI tract. It regulates genes related to inflammation and antioxidant activity as well as genes involved in proliferation responses to inflammation. Regulation of pulmonary mucosal function by Chonluten may have important applications in chronic inflammatory diseases of the lung such as asthma and COPD.

Chonluten Structure

Molecular Formula:	C ₁₁ H ₁₇ N ₃ O ₈
Molecular Weight:	319.27 g/mol
PubChem CID:	194641
CAS No:	75007-24-8
Alternative Names:	T-34 tripeptide, EDG
