Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Dipeptide-3
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T, MoneyGram
- Supply Ability: 4000kg/Month

Product Specification

Product Description

Product Description:

The Cosmetic Peptide product is a revolutionary skincare solution that harnesses the power of Peptide Complex for Cosmetic Applications. Peptides are short chains of amino acids that are essential building blocks of proteins in the skin. When applied topically, peptides can provide a wide range of benefits for the skin, making them a popular choice for cosmetic use. Peptide for Cosmetic Use is known for its ability to promote collagen production in the skin. Collagen is a key protein that helps maintain skin firmness and elasticity, making it crucial for a youthful and healthy complexion. By stimulating collagen synthesis, Peptide Complex can help reduce the appearance of fine lines and wrinkles, leading to smoother and more youthful-looking skin. In addition to collagen stimulation, Cosmetic Peptide can also help improve skin hydration and texture. Peptides have been shown to support the skin's natural barrier function, helping to lock in moisture and prevent water loss. This can result in plumper, more hydrated skin that looks and feels soft and supple. Another key benefit of Peptide Complex for Cosmetic Applications is its ability to promote skin repair and regeneration. Peptides can help accelerate the skin's natural healing processes, making them ideal for addressing issues such as sun damage, hyperpigmentation, and acne scars. By supporting skin renewal, peptides can help reveal a brighter, more even-toned complexion. Furthermore, Peptide for Cosmetic Use can also have antioxidant properties, helping to protect the skin from environmental damage and premature aging. By neutralizing free radicals and reducing oxidative stress, peptides can help maintain skin health and vitality for a radiant and youthful appearance. The Cosmetic Peptide product is formulated with a potent blend of peptides carefully selected for their efficacy and safety. Each peptide works synergistically to deliver comprehensive skincare benefits, ensuring optimal results for a variety of skin concerns. Whether you are looking to address signs of aging, improve skin texture, or enhance overall skin health, Cosmetic Peptide offers a versatile solution for all your skincare needs. When incorporated into your daily skincare routine, Cosmetic Peptide can help rejuvenate and revitalize your skin, restoring its natural radiance and youthfulness. With consistent use, you can expect to see visible improvements in skin tone, texture, and overall appearance, leading to a more confident and radiant complexion. Experience the transformative power of Peptide Complex for Cosmetic Applications with the Cosmetic Peptide product and discover the difference it can make for your skin. Say goodbye to dull, tired-looking skin and hello to a luminous, youthful glow with the help of this innovative skincare solution.

Features:

Facial Peptide for Beauty
Advanced Peptide Formula for Skincare
Peptide Complex for Cosmetic Applications

Technical Parameters:

Product Attribute	Technical Parameter
Product Name	Advanced Peptide Formula for Skincare
Grade	Cosmetic Grade
Type	Peptide Treatment
Application	Facial Peptide for Beauty

Applications:

The Hongbaiyi Cosmetic Peptide, model number HBY-Dipeptide-3, is a versatile product with a wide range of application occasions and scenarios in the beauty and skincare industry. Peptides in cosmetics have gained popularity due to their ability to address various skin concerns effectively. The Facial Peptide for Beauty by Hongbaiyi is no exception, offering a potent blend of peptides that can rejuvenate and revitalize the skin. One of the key application scenarios for the Hongbaiyi Peptide Complex is in anti-aging formulations. The peptides in this product have been proven to reduce the appearance of fine lines and wrinkles, making it ideal for anti-aging creams and serums. Another common use for the HBY-Dipeptide-3 is in firming and lifting skincare products. The peptide complex helps improve skin elasticity and firmness, making it a valuable ingredient in products designed to combat sagging skin. Furthermore, this cosmetic peptide is also suitable for brightening and evening out skin tone. Incorporating the Hongbaiyi Peptide Complex into serums or creams can help fade dark spots and pigmentation, resulting in a more radiant complexion. Whether formulating serums, creams, or masks, the Hongbaiyi Cosmetic Peptide is a versatile ingredient that can enhance the efficacy of various skincare products. Its certification including COA and HPLC MR ensures the quality and authenticity of the product, making it a reliable choice for cosmetic applications. With a minimum order quantity of 1KG and a negotiable price, the Hongbaiyi Peptide Complex offers flexibility for both small-scale and large-scale cosmetic manufacturers. Payment terms such as Western Union, T/T, and MoneyGram make transactions convenient, while a supply ability of 4000kg/month ensures consistent availability. In addition, the fast delivery time of 3-5 work days after payment, along with the option of packaging in aluminum bags or 25KG/fibre drums, further enhances the convenience of using the Hongbaiyi Cosmetic Peptide for various beauty and skincare formulations.
