

Vesilute 20mg The Essential Cosmetic Peptide for Prostate and Urinary Tract Health

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: HBY
- Certification: COA, HLPC, MR
- Model Number: HBY-Vilon20mg
- Minimum Order Quantity: 5boxes
- Price: US\$37-38/box
- Packaging Details: 20mg/vials 10vials/box

Product Specification

Product Description

Vesilute 20mg (Bioregulator)

Vesilute is a Khavinson bioregulator peptide with research exploring its role in regulating the urinary tract and prostate gland. Research evidence indicates that Vesilute may help to relieve symptoms associated with bladder and urinary tract dysfunction. Vesilute and other cytomedines have been shown to reduce prostate dysfunction and are thought to act by improving microcirculation in the prostate and by reducing cell proliferation. The latter effect may be due to changes in chromosome density and epigenetic factors, a mechanism of cellular regulation that is common among Khavinson peptides.

Vesilute Structure

Amino Acid Sequence: Glu-Asp (ED)

Molecular Formula: C₉H₁₄N₂O₇

Molecular Weight: 262.20 g/mol

PubChem CID: 99716

CAS Number: 3918-84-1

Synonyms: alpha-glutamylaspartic acid, SCHEMBL1674753, vesilut, ED dipeptide
