

HBV-Vitamin B12 Oil

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: ISO, MUI, HACCP, HALAL
- Model Number: HBV-Vitamin B12
- Minimum Order Quantity: 10vials
- Price: Negotiable
- Delivery Time: 3-5days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 30000vials/month

Vitamin B12

Product Specification

- Item: Vitamin B12
- Packing: 1mg/ml/vial *10mlvial*10ml Or 10mg/ml/vial *10mlvial*10ml
- Appearance: Deep Red, Reddish-brown, Or Dark Pink Color

Product Description

HBV-Vitamin B12 Oil

The bioactive form of vitamin B12, fermented from plants, is easily absorbed by the human body and is not affected by metabolic disorders. Adenosine cobalamin and vitamin B12 are crucial for the metabolism of amino acids and hormones. It also has therapeutic effects on muscle weakness, nerve and liver damage, and chronic fatigue.

Vitamins are crucial for the body, and liquid vitamins have many benefits. Liquid vitamins do not need to be broken down by the body and can be fully absorbed within 1 to 4 minutes, with extremely high bioavailability. Swallowing capsules or pills is not always easy. Taking liquids is usually much easier.

Vitamin B12 (cobalamin)

Vitamin B12 plays many important roles in the human body. It helps alleviate fatigue and maintain normal energy metabolism. It helps maintain the normal functioning of the psychological, immune, and nervous systems, supports the generation of red blood cells, and is beneficial for normal homocysteine metabolism. The human body also needs vitamin B12 to promote cell division. Vitamin B12 acts as a coenzyme in the body, which means it is crucial for the normal function of certain enzymes in the body. The related reaction directly depends on vitamin B12, and it cannot proceed without vitamin B12.

Bioactive Vitamin B12

Vitamin B12 (cobalamin) exists in various chemical forms and plays different roles in the body. The natural vitamin B12 that directly acts in the body is called a "biologically active coenzyme". On the other hand, the synthesized active ingredients of vitamin B12, such as the commonly used cyanocobalamin, do not have direct vitamin effects and must first be converted into a form that can be used by the human body.

The coenzyme forms of vitamin B12 with biological activity in the body are methylcobalamin and adenosyl cobalamin. The two act on different parts and have completely different reactions, so the human body needs two forms of vitamin B12 and can convert them into each other. Methylcobalamin participates in the methylation cycle in the cytoplasm, which has profound effects on various health fields such as hematopoiesis, psychology, and the nervous system.

According to the European Food Safety Authority (EFSA), the health benefits of vitamin B12 that helps:

- Normal energy metabolism
- Normal nervous system function
- Normal homocysteine metabolism
- Normal cognitive function
- Normal red blood cell generation
- The immune system is functioning normally
- Reduce fatigue
- Cell division

FAQ

Q1: Do you Accept Sample Orders?

A: Yes. The smallest order we accept is 10vials.

Q2: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q3: Do you accept VISA business credit cards?

A: Yes. VISA business credit card is in our payment.

Q4: Is there any discount?

A: Yes, if you want to purchase a larger quantity, we can offer a better price for you.

Q5: What kind of transportation do you have?

A: We have many ways of transportation, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
