

Eloralintide (LY3841136) Research Peptide – High-Purity Selective Amylin Receptor Agonist

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: HBY
- Certification: COA
- Model Number: HBY-Eloralintide
- Minimum Order Quantity: 5 boxes
- Price: Negotiable
- Packaging Details: 5/10/15mg/vial, 10vials/Box
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 boxes per month

Product Specification

- Product Name: Eloralintide (LY3841136)
- CAS Number: 2883634-40-8
- Molecular Formula: $C_{201}H_{319}N_{49}O_{65}S_2$
- Molecular Weight: 4526.16 G/mol
- Form: Lyophilized Powder
- Appearance: White To Off-white Powder

Product Description

Eloralintide (LY3841136) – Selective Long-Acting Amylin Receptor Agonist

Eloralintide is a novel, investigational selective amylin receptor agonist (AMY1R-preferring) developed as a research compound for studying appetite regulation, satiety signaling, gastric emptying, and metabolic pathways. It is a synthetic analog of human amylin engineered with structural modifications, including a C20 fatty diacid conjugation for extended half-life, supporting once-weekly dosing models in research settings.

Unlike non-selective amylin analogs, Eloralintide shows preferential activation of the human amylin 1 receptor (approximately 12-fold selectivity over the calcitonin receptor in reported studies). This selectivity profile is of particular interest in research exploring improved gastrointestinal tolerability alongside effects on food intake and body weight regulation in preclinical and clinical models.
