

98% Purity CBL-514 10mg/Vial*10vials/Box Lyophilized Powder

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: HBY
- Certification: COA
- Model Number: HBY-CBL-514
- Minimum Order Quantity: 5 boxes
- Price: Negotiable
- Packaging Details: 10mg
- Delivery Time: 3-5 work days after your payment
- Payment Terms: T/T
- Supply Ability: 5,000 boxes /month

Product Specification

- Product: CBL-514
- Form: Lyophilized Powder
- Amount: 10 Mg Vial
- Store Temp: -20°C

Product Description

How CBL-514 Works

CBL-514 is an innovative small-molecule designed for targeted, localized body contouring. Unlike GLP-1 and GIP receptor agonists, which primarily influence appetite regulation, CBL-514 focuses on adipose tissue in specific areas.

Following subcutaneous administration, CBL-514 is designed to target fat cells through a selective biological mechanism. This process supports the gradual clearance of cellular components by the body's natural processes over the following weeks.

By focusing on localized adipose tissue, CBL-514 is being investigated for its potential to support targeted fat reduction and body contouring.
